Ibeagha-Awemu, Sunday O. Peters, Appolinaire Djikeng, John E. O. Rege, 2025-12-02 This open access book is a rich resource that chronicles the abundant livestock genetic resources in Africa Organized in five sections the chapters trace special productive and adaptive attributes of African livestock breeds past breed improvement efforts capacity building and strategies to effective utilization of available genetic resources in the era of modern technologies The authors cover major farm animal groups as well as dromedaries rabbits and grasscutters In view of the UN Sustainable Development Goals in particular SDG 2 Zero Hunger and SDG 15 Life on Land the purpose of this volume is to catalogue opportunities that can be leveraged with available technologies and technical knowhow for achieving rapid genetic gain and improved livestock productivity in Africa It fosters the utilization of genetic resources and the protection of indigenous livestock biodiversity Natural selection and humans have generated genetically diverse breeds of domesticated farm animals which can

significantly contribute to the livelihoods of millions of Africans today Africa's indigenous livestock are particularly hardy and well adapted to local production contexts having evolved adaptations to the continent's diverse climatic conditions and environmental pressures In spite of the wealth of desirable genetic traits however some of Africa's iconic and lesser known livestock are disappearing at an alarming rate Moreover despite increasing recognition of what this diversity portends little has been done to understand and optimally harness the full potential of these genetic resources By combining scientific basis and practical instructions this work is a valuable manual for a diverse readership including students researchers livestock farmers livestock and non governmental organizations policy makers and business professionals who want to understand the uniqueness of African livestock genetic resources production systems and strategies for sustainable improvement for the African environment

Energy Justice and Energy Law Iñigo del Guayo, Lee Godden, Donald D. Zillman, Milton Fernando Montoya, José Juan González, 2020-05-21 Energy justice has emerged over the last decade as a matter of vital concern in energy law which can be seen in the attention directed to energy poverty and the United Nations Sustainable Development Goals There are energy justice concerns in areas of law as diverse as human rights consumer protection international law and trade and in many forms of regional and national energy law and regulation This edited collection explores in detail at four kinds of energy justice The first distributive justice relates to the equitable distribution of the benefits and burdens of energy activities which is challenged by the existence of people suffering from energy poverty Secondly procedural or participation justice consists of the right of all communities to participate in decision making regarding energy projects and policies that affect them This dimension of energy justice often includes procedural rights to information and access to courts Under the concept of reparation or restorative justice the book looks at even handed enforcement of energy statutes and regulations as well as access to remedies when legal rights are violated Finally the collection addresses social justice with the recognition that energy injustice cannot be separated from other social ills such as poverty and subordination based on race gender or indigeneity These issues feed into a wider conversation about how we achieve a just energy transition as the world confronts the urgent challenges of climate change
