Account Xstream Paper 2013:

Public Papers of the Presidents of the United States United States. President, 2013 Containing the public messages speeches and statements of the President 1956 1992 *Large Meteorite Impacts and Planetary Evolution V* Gordon R. Osinski, David Allen Kring, 2015 In this volume the geologic and planetary science communities explore impact events and how they affected the evolution of Earth and other planetary bodies these papers are the outcome of a conference held every five years **Youth's Companion** , 1904 *IRA Asset Allocation, 2013, and Longitudinal Results, 2010-2013* Craig Copeland, 2015 This paper is the fifth examination of asset allocation from the EBRI IRA Database an ongoing project that collects data from IRA plan administrators For 2013 it contained information on 25.8 million accounts with total assets of 24.6 trillion The number of IRAs in the database with complete asset allocation data was lower at 21.1 million accounts with 21.1 trillion in assets This paper examines asset allocation on a dollar weighted basis within IRAs by type and account balance as well as by gender and age of the account owner In addition to presenting the average asset allocation across the accounts this study includes a presentation of the percentage of accounts with extreme allocations either less than 10 percent or more than 90 percent in a particular asset category This helps illustrate the distribution of the allocations to the various assets across all of the IRAs Furthermore a longitudinal component is added to this study to see how the asset allocations of those in the database have changed The latest data from the EBRI IRA Database show that more than half of all IRA assets were allocated to equities although this varied with age account balance and IRA type Gender differences in asset allocations were minimal Those older or owning a traditional IRA had on average lower allocations to equities Individuals with the largest balances had the lowest combined exposure to equities including the addition of the equity share of balanced funds to the pure equity funds This study includes the first look at asset allocation longitudinally from 2010 2013 and finds that equity allocations in 2013 were higher than they were in 2010 and 2012 This result appears to be driven by the nearly 50 percent of accounts that remained at an extreme value 0 percent or 100 percent allocation in both years and the higher probability of a positive change from 2010 to 2013 in the equity allocation The PDF for the above title published in the September 2015 issue of EBRI Notes also contains the full text of another September 2015 EBRI Notes article abstracted on SSRN 2015 EBRI Greenwald Associates Health and Voluntary Workplace Benefits Survey Most Workers Continue to Give Low Ratings to Health Care System but Declining Number Report Health Care Cost Increases
