## Accounting Basics

### Accounting Standards

- Accounting principles have been in existence since the late 1400s when devised by Luca Pacioli, an Italian mathematician, and have evolved over time.
- Modern-day accounting principles in the United States are called generally accepted accounting principles (GAAP); these principles guide the work of accountants and auditors.
- The U.S. Securities and Exchange Commission (SEC) has regulatory authority over accounting principles used by public corporations.
- The SEC is a federal agency responsible for enforcing the federal securities laws and regulating the securities industry.
- It delegates the responsibility for the development of GAAP to the accounting profession via the Financial Accounting Standards Board (FASB).
- The FASB develops new standards via due process activities that allow input from accountants and executives in business and industry.
- The International Accounting Standards Board (IASB) develops global accounting standards.
- Many national companies follow IASB standards.
- The IASB works with other key global accounting standards bodies to create a single source of accounting standards.
- The Government Accounting Standards Board (GASB) sets state and local governmental standards for accounting.
- The GASB is a private, nongovernmental organization subject to oversight and funding by the Financial Accounting Foundation (FAF).
- The Federal government follows standards set by the FASB when performing accounting for its units.

### Concepts & Principles

- Entity concept:**
  - An organization stands apart from other organizations as a separate economic unit.
  - Assets and obligations must be accounted for separately from the personal resources and obligations of its owners.
- Closing concept (GAAP, consistency assumption):** The entity will continue to operate long enough to meet its contractual obligations and carry out plans.
  - Time period concept:**
    - Businesses should report information at regular intervals.
    - Annual reports show income for the last 12 months and end on the last day of the fiscal year; therefore, annual reports show the financial position as of the last day of the fiscal year.
  - Public companies report based on quarterly (3-month) time intervals.
- Reliability principle:**
  - Accounting records must be based on the most reliable data available.
  - Reliable information is accurate, objective (unbiased), and verifiable.
- Relevance principle:**
  - Accounting information must be timely.
  - Accounting information is predictive, provides feedback, and helps decision makers.
- Cost principle:** Assets and services acquired are recorded at actual, historical-cost rather than current value.
- Conservatism:**
  - Cost must be exceeded to avoid overstating assets and expenses and understating revenues and liabilities.
  - Accounting estimates should be based on conservative assumptions.
- Revenue principle:**
  - Revenues should only be recorded when earned.
  - Earnings is earned when the business has completed rendering services to the customer.
  - The amount is equal to the fair value of services or goods.
  - The collection of cash must be reasonably assured on credit sales.
- Matching principle:**
  - Expenses must be matched against revenues in the same accounting period.
  - Costs incurred to generate revenues in a period are recognized as expenses.
- The accounting period:**
  - The accounting period is the period covered by the income statement.
  - It is usually 1 year ending on Dec. 31 (unless the fiscal year is the calendar year).
  - The fiscal year can end on any other date of the year chosen by management.
- Cash-basis accounting:**
  - The impact of events is not recognized until cash is paid or received.
  - Revenue is recorded when cash is received; expenses are recorded when cash is paid.
  - This method is adequate for small companies that don't report to external parties, but it is not acceptable under GAAP.
- Accrual-Basis accounting:**
  - The impact of events is recognized as they occur.
  - Revenue is recorded when earned; expenses are recorded when incurred.
  - Transactions are recorded even when cash has not been received or paid.
  - This method is required by GAAP.

### The Accounting Equation

$$\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$$

### 1. Assets:

- Assets are economic resources expected to benefit the company in the future; they result from past transactions.
  - Cash, Checks, certificates of deposit, and checks.
  - Accounts receivable: Credit or implied promises, usually in the form of sales made to customers without an immediate cash receipt.
  - Notes receivable: Promissory notes, a signed note usually with payment stipulations such as time period and interest rate.
  - Inventories: Maintenance of the units held for manufacture or sale.
  - Supplies: Assets used in the everyday running of the business; examples include office and cleaning supplies.
  - Prepaid expenses: Expenditures for goods and services to be received in the future.
  - Land: Property the business owns and uses in operations.
  - Buildings: Cost of an office, warehouse, plant, etc.
  - Equipment: Machines and fixtures: Cost of office and manufacturing equipment.
  - Assets are listed on the balance sheet in order of liquidity.
  - Assets are listed according to current versus long-term status.
- Liabilities:** Economic obligations or debts; probable sacrifices of assets resulting from past transactions.
  - Accounts payable: Credit or implied promises to pay debts that arise from credit purchases.
  - Notes payable: Amounts the company must pay as a result of signing a promissory note for goods or services.
  - Taxes payable: Taxes and salaries payable.
  - Unearned revenue: Money received for services not yet rendered, or products not yet delivered; examples include cash received for future tickets, flights, and/or shows, advance payment on yet delivered, or season tickets (gymnastics not yet played).
- Owner's equity:** Claims held by owners; the difference between assets and liabilities divided into two main categories.
  - Contributed or paid-in capital:** Amounts invested in the corporation by its owners.
    - Par value stock: The value printed on a share certificate; generally a small, arbitrary value.
    - Common capital: In excess of par: The total amount of capital raised in a ratio of stock less the par value of that stock.
      - EG: 100,000 shares of \$2 par value stock, sold \$10 per share paid-in-capital is excess of par would be \$800,000 paid-in capital of \$200,000 less \$200,000 of par value.
  - Retained earnings:** Income earned from operations.
    - Expenses: Decreases in retained earnings resulting from operations.
    - Revenues: Increases in retained earnings resulting from operations.
    - Dividend: Distribution of assets to shareholders; decreases in retained earnings.
    - Change in retained earnings: Beginning Retained Earnings - Net Income for the Period.

## Financial Statements: Formal Reports of an Entity

### Balance Sheet (Statement of Financial Position)

- Assets are balanced with the sum of liabilities and owner's equity as of a specific date.
- Prepared after the income statement and the statement of retained earnings.
- Current assets:**
  - Cash and other resources expected to be cash, sold, or used up during the normal operating cycle of the business (usually 1 year).
  - Typical current assets: Cash, receivable, inventories, investments, supplies, and prepaid expenses.
- Noncurrent assets:**
  - Assets that are not current assets.
  - Typical noncurrent assets: Buildings, equipment, furniture, fixtures, land, natural resources, and intangible assets (patents and goodwill).
- Current liabilities:**
  - Obligations that will be paid within the operating cycle (usually 1 year).
  - Typical current liabilities: Accounts payable, wages and salaries payable, taxes payable, unearned revenues, and short-term notes payable.
- Noncurrent liabilities:**
  - Liabilities that are not current liabilities.
  - Typical noncurrent liabilities: The long-term portion of any payable liabilities, capital leases, pension benefit obligations, and long-term obligations under product or service warranties.
- Equity:**
  - The difference between assets and liabilities.
  - Typical equity: Capital contributed by owners and retained earnings.
