*Accounting Information Systems for Decision Making* Daniela Mancini, Eddy H. J. Vaassen, Renata Paola

Dameri, 2013-04-18. This book contains a collection of research papers on accounting information systems including their strategic role in decision processes within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research including design, acceptance and reliance, value added, decision making, interorganizational links and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular, it focuses on themes of growing interest in the realm of XBRL and Financial Reporting Management Information Systems, IT IS Audit and IT IS Compliance. The book will be of interest to financial and managerial accountants and IT IS practitioners including information systems managers and consultants. 2003
