**Storyline:** Based on the true story of the ill-fated 1970 Apollo mission bound for the moon. Astronauts Lovell, Haise and Swigert were scheduled to fly Apollo 13, but are enroute up to 131,000 miles and The LGS has already achieved their lunar Sampling-goal, so they must interrupt this "routine" flight... until that is, things go very wrong, and they're off a safe return path. — Taken from [imdb.com](http://www.imdb.com)

Just a little background information:

Typical space missions (of travelling to space can even be called "typical") begin from Cape Canaveral, Florida. Mission Control, where engineers and experts work in command and communication with astronauts, was located in Houston, Texas. After re-entering into the earth's atmosphere, the equipment and men would land in the Pacific Ocean.
