Labyrinths of Iron Benson Bobrick, 1994-03-01 Traces the history and development of subways focusing on the systems in London Paris and New York      **Art and the Subway** Tracy Fitzpatrick, 2009 Explores artistic production surrounding the world's most famous public transportation system from just before its opening in 1904 onwards Using images this work offers perspectives on ways in which the subway has been used as a subject about which to make art as a site within which to make art and as a canvas upon which to make art      **Labyrinths of Iron** Benson Bobrick, 1986 Reprint of the esteemed book originally published by Newsweek Books in 1981 Annotation copyright by Book News Inc Portland OR      **Metropolis on the Styx** David L. Pike, 2018-07-05 In *Metropolis on the Styx* David L Pike considers how underground spaces and their many myths have organized ways of seeing thinking about and living in the modern city Expanding on the cultural history of underground construction in his acclaimed previous book *Subterranean Cities* Pike details the emergence of a vertical city in the imagination of nineteenth century Paris and London a city overseen by hosts of devils and undermined by subterranean villains a city whose ground level was replete with passages between above and below *Metropolis on the Styx* brings together a rich variety of visual and written sources ranging from pulp mysteries and movie serials to the poetry of Charles Baudelaire and the novels of Marcel Proust F Scott Fitzgerald and Elinor Glyn to the broadsheets and ephemera of everyday urban life From these materials Pike conjures a working theory of modern underground space that explains why our notions about urban environments remain essentially nineteenth century in character even though cities themselves have since changed almost beyond recognition Highly original in subject matter methodology and conclusions *Metropolis on the Styx* synthesizes a number of critical approaches periods of study and disciplines in the analysis of a single category of space the underground Pike studies the built environments and the textual and visual ephemera including little known or unknown archival material of Paris London and other cities in conjunction with canonical modern literature and art This book integrates a rich visual component photographs movie stills prints engravings paintings cartoons maps and drawings of actual and imagined subterranean spaces into the fabric of the argument      **Riding the New York Subway** Stefan Hohne, 2021-02-16 A history of New York subway passengers as they navigated the system's constraints while striving for individuality or at least a smooth ride When the subway first opened with much fanfare on October 27 1904 New York became a city of underground passengers almost overnight In this book Stefan Hohne examines how the experiences of subway passengers in New York City were intertwined with cultural changes in urban mass society throughout the twentieth century Hohne argues that underground transportation which early passengers found both exhilarating and distressing changed perceptions interactions and the organization of everyday life      Inventing Modern John H. Lienhard, 2003-09-18 Modern is a word much used but hard to pin down In *Inventing Modern* John H Lienhard uses that word to capture the furious rush of newness in the first half of 20th century America An unexpected world emerges from under the more familiar Modern Beyond the airplanes

radios art deco skyscrapers Fritz Lang's Metropolis Buck Rogers the culture of the open road Burma Shave Kerouac and White Castles lie driving forces that set this account of Modern apart One force says Lienhard was a new concept of boyhood the risk taking hands on savage inventor Driven by an admiration of recklessness America developed its technological empire with stunning speed Bringing the airplane to fruition in so short a time for example were people such as Katherine Stinson Lincoln Beachey Amelia Earhart and Charles Lindbergh The rediscovery of mystery powerfully drove Modern as well X Rays quantum mechanics and relativity theory had followed electricity and radium Here we read how with reality seemingly altered hope seemed limitless Lienhard blends these forces with his childhood in the brave new world The result is perceptive engaging and filled with surprise Whether he talks about Alexander Calder an engineer whose sculptures were exercises in materials science or that wacky paean to flight Flying Down to Rio unexpected detail emerges from every tile of this large mosaic Inventing Modern is a personal book that displays rather than defines an age that ended before most of us were born It is an engineer's homage to a time before the bomb and our terrible loss of confidence a time that might yet rise again out of its own postmodern ashes

**Subways** Lorraine B. Diehl, 2004 In Subways her highly anticipated follow up to The Automat Diehl sets off on another sentimental journey recounting the true story of a city transformed by underground passageways
