This book covers point of care ultrasound POCUS in a practical problem oriented and illustrated manner. It begins with an introduction to the basic principles of medical ultrasound imaging and ultrasound guided interventions and outlines point of care ultrasound in a lucid manner for rapid learning for medical students as well as practitioners. It contains chapters on ultrasound of the airways, thoracic ultrasound including lungs and transthoracic screening echocardiogram, vascular assessment, ultrasound of the abdomen for focussed trauma assessment, gastric volume assessment, and ultrasound guided interventions such as vascular cannulations, pleurocentesis, etc., along with some of the latest point of care ultrasound techniques such as ocular assessment and assessment of the foetus and placenta in the operation theatre. This book will help the intensivist, emergency physician, and anaesthesiologist to learn the basics of POCUS, which ostensibly is the future of medical practice. It also includes objective structured clinical examination (OSCE) questions after every chapter as well as multiple choice questions (MCQs) that will benefit the students greatly. The book also includes videos from some of the celebrated practitioners of POCUS, providing a unique learning experience. This book is suited for students, trainees, and practitioners alike. The modules of POCUS described here are part of the curriculum of anaesthesiology in the UK, USA, Singapore, Australia, New Zealand, and most of the countries. The book also covers the curriculum of POCUS in critical care and emergency medicine courses.

Guide for the selection of chemical agent and toxic industrial material detection equipment for emergency first responders (2000), *Sittig's Handbook of Toxic and Hazardous Chemicals and Carcinogens* Richard P. Pohanish, 2008-01-10

For more than a quarter century, Sittig's Handbook of Toxic and Hazardous Chemicals and Carcinogens has proven to be among the most reliable, easy to use, and essential reference works on hazardous materials. Sittig's 5th Edition remains the lone comprehensive work providing a vast array of critical information on the 2,100 most heavily used, transported, and regulated chemical substances of both occupational and environmental concern. Information is the most vital resource anyone can have when dealing with potential hazardous substance accidents or acts of terror. Sittig's provides extensive data for each of the 2,100 chemicals in a uniform format, enabling fast and accurate decisions in any situation. The chemicals are presented alphabetically and classified as a carcinogen, hazardous substance, hazardous waste, or toxic pollutant. This new edition contains extensively expanded information in all 28 fields for each chemical (see table of contents) and has been updated to keep pace with world events. Chemicals classified as WMD have been included in the new edition, as has more information frequently queried by first responders and frontline industrial safety personnel. Includes and references European chemical identifiers and regulations. The only single source reference that provides such in-depth information for each chemical. The
