*FM 2012: Formal Methods* Dimitra Giannakopoulou, Dominique Mery, 2012-08-21 This book constitutes the refereed proceedings of the 18th International Symposium on Formal Methods FM 2012 held in Paris France in August 2012 The 28 revised full papers presented together with 7 tool papers and 3 invited talks were carefully reviewed and selected from numerous submissions The papers cover several aspects of formal methods including verification synthesis runtime monitoring testing and controller synthesis as well as novel applications of formal methods in interesting domains such as satellites autonomous vehicles and disease dynamics

**Plain Text** Dennis Tenen, 2017-06-20 This book challenges the ways we read write store and retrieve information in the digital age Computers from electronic books to smart phones play an active role in our social lives Our technological choices thus entail theoretical and political commitments Dennis Tenen takes up today's strange enmeshing of humans texts and machines to argue that our most ingrained intuitions about texts are profoundly alienated from the physical contexts of their intellectual production Drawing on a range of primary sources from both literary theory and software engineering he makes a case for a more transparent practice of human computer interaction Plain Text is thus a rallying call a frame of mind as much as a file format It reminds us ultimately that our devices also encode specific modes of governance and control that must remain available to interpretation

**Intelligent Autonomous Systems** Dilip Kumar Pratihar, 2010-03-11 Intelligent Autonomous Systems IAS are the physical embodiment of machine intelligence providing a core concept for integrating various advanced technologies with pattern recognition and learning The basic philosophy of IAS research is to explore and understand the nature of intelligence in problems of perception reasoning learning and control in order to develop and implement the theory to engineered realization In other words the objective is to formulate various methodologies for the development of robots which can operate autonomously and exhibit intelligent behavior by making appropriate decisions to perform the right task at the right time Since IAS basically deals with the integration of machines computing sensing and software to create intelligent systems capable of interacting with the complexities of the real world advanced topics like soft computing artificial life evolutionary biology and cognitive psychology have great promise in improving its intelligence and performance Because of the inter

disciplinary character the subject has several challenging issues for research design and development covering a number of disciplines. These issues are further concerned with the development of both technology and methodology apart from various operations. The present research monograph titled *Intelligent Autonomous Systems Foundations and Applications* edited by two renowned researchers Professor Dilip K Pratihar of IIT Kharagpur India and Professor Lakhmi C Jain University of South Australia Australia provides a fairly representative cross section of the activities that is going on all over the world in this area.

*Cars & Parts ,1972 Crowd Dynamics, Volume 1* Livio Gibelli, Nicola Bellomo, 2019-01-22 This volume explores the complex problems that arise in the modeling and simulation of crowd dynamics in order to present the state of the art of this emerging field and contribute to future research activities. Experts in various areas apply their unique perspectives to specific aspects of crowd dynamics covering the topic from multiple angles. These include a demonstration of how virtual reality may solve dilemmas in collecting empirical data a detailed study on pedestrian movement in smoke filled environments a presentation of one dimensional conservation laws with point constraints on the flux a collection of new ideas on the modeling of crowd dynamics at the microscopic scale and others. Applied mathematicians interested in crowd dynamics pedestrian movement traffic flow modeling urban planning and other topics will find this volume a valuable resource. Additionally researchers in social psychology architecture and engineering may find this information relevant to their work.

**Evacuation Modeling Trends** Arturo Cuesta, Orlando Abreu, Daniel Alvear, 2015-10-17 This book presents an overview of modeling definitions and concepts theory on human behavior and human performance data available tools and simulation approaches model development and application and validation methods. It considers the data and research efforts needed to develop and incorporate functions for the different parameters into comprehensive escape and evacuation simulations with a number of examples illustrating different aspects and approaches. After an overview of basic modeling approaches the book discusses benefits and challenges of current techniques. The representation of evacuees is a central issue including human behavior and the proper implementation of representational tools. Key topics include the nature and importance of the different parameters involved in ASET and RSET and the interactions between them. A review of the current literature on verification and validation methods is provided with a set of recommended verification tests and examples of validation tests. The book concludes with future challenges new scenarios and factors for future model developments addresses the problem of using deterministic and or stochastic approaches and proposes and discusses the use of evacuation models for supporting timely decisions in real time. Written by international experts *Evacuation Modeling Trends* is designed for those involved in safety from emergency and intervention personnel to students engineers and researchers.
