Friston,2017-06-22 There is a growing appreciation that many psychiatric and neurological conditions can be understood as functional disconnection syndromes as reflected in aberrant functional integration and synaptic connectivity This Research Topic considers recent advances in understanding psychopathology in terms of aberrant effective connectivity as measured noninvasively using functional magnetic resonance imaging fMRI Recently there has been increasing interest in inferring directed connectivity effective connectivity from fMRI data Effective connectivity refers to the influence that one neural system exerts over another and quantifies the directed coupling among brain regions and how they change with pathophysiology Compared to functional connectivity effective connectivity allows one to understand how brain

regions interact with each other in terms of context sensitive changes and directed coupling and therefore may provide mechanistic insights into the neural basis of psychopathology Established models of effective connectivity include psychophysiological interaction PPI structural equation modeling SEM and dynamic causal modelling DCM DCM is unique because it explicitly models the interaction among brain regions in terms of latent neuronal activity Moreover recent advances in DCM such as stochastic and spectral DCM make it possible to characterize the interaction between different brain regions both at rest and during a cognitive task

year end to the date of its auditor s report Due to the great development of the globalization and economy this world has more economical data and is more complicated in an economical context than before Proof for this statement is the subprime crisis 2007 where Asset Backed Commercial Papers had a complicated transformation In addition to this the accounting has issues with too much information and complicated financial products At first accounting has problems with disclosure of information in the financial statement Secondly Big Data challenges accounting and finally audit report lags are larger after a new standard is set by the standard setter or a company has a poor performance in this particular fiscal year In addition to this last problem there are a lot of more determinants for an audit report lag than these two Accordingly this audit report lag is a problem for accounting
