In addition its GPS antenna and tools make accurate location determination and navigation possible. It fits easily into any briefcase and even into a large pocket making it very easy carry around. The main challenge of mobile computing is possibly to get online in different situations in a way that is inexpensive secure and effective. While both mobile cellular broadband and public Wi Fi networks are rapidly being expanded and improved it may still now and then be difficult or expensive to connect when you are outside your carrier's coverage. If you can find a fast and inexpensive connection it may not be secure.
