Ethical Design of Artificial Intelligence-based Systems for Decision Making Valentina Franzoni,Jordi Vallverdu,Roberto Capobianco,Giulio Biondi,Alfredo Milani,Francesca Alessandra Lisi,Stefano Cagnoni,2023-11-29 Artificial Intelligence AI including Machine Learning with Deep Neural Networks is making and supporting decisions in ways that increasingly affect humans in many aspects of their lives Both autonomous and decision support systems applying AI algorithms and data driven models are used for decisions about justice education physical and psychological health and to provide or deny access to credit healthcare and other essential resources in all aspects of daily life in increasingly ubiquitous and sometimes ambiguous ways Too often these systems are built without considering the human factors associated with their use and the need for clarity about the correct way to use them and possible biases Models and systems provide results that are difficult to interpret and are accused of being good or bad whereas good or bad is only the design of such tools and the necessary training for them to be properly integrated into human values *Freshwater Fisheries Ecology* John F. Craig,2015-11-09 Inland fisheries are vital for the livelihoods and food resources of humans worldwide but their importance is underestimated probably because large numbers of small local operators are involved Freshwater Fisheries Ecology defines what we have globally what we are going to lose and mitigate for and what given the right tools we can save To estimate potential production the dynamics of freshwater ecosystems rivers lakes and estuaries need to be understood These dynamics are diverse as are the earths freshwater fisheries resources from boreal to tropical regions and these influence how fisheries are both utilized and abused Three main types of fisheries are illustrated within the book artisanal commercial and recreational and the tools which have evolved for fisheries governance and management including assessment methods are described The book also covers in detail fisheries development providing information on improving fisheries through environmental and habitat evaluation enhancement and rehabilitation aquaculture genetically modified fishes and sustainability The book thoroughly reviews the negative impacts on fisheries including excessive harvesting climate change toxicology

impoundments barriers and abstractions non native species and eutrophication Finally key areas of future research are outlined Freshwater Fisheries Ecology is truly a landmark publication containing contributions from over 100 leading experts and supported by the Fisheries Society of the British Isles The global approach makes this book essential reading for fish biologists fisheries scientists and ecologists and upper level students in these disciplines Libraries in all universities and research establishments where biological and fisheries sciences are studied and taught should have multiple copies of this hugely valuable resource About the Editor John Craig is Editor in Chief of the Journal of Fish Biology and has an enormous range of expertise and a wealth of knowledge of freshwater fishes and their ecology having studied them around the globe including in Asia North America Africa the Middle East and Europe His particular interests have been in population dynamics and life history strategies He is a Fellow of the Linnean Society of London and the Royal Society of Biology **Stevens'**
