## **Answer Algebra 2 Quarter Benchmark:**

**Mathematics Benchmarking Report**, 2001      *On the Extrapolation with the Denton Proportional Benchmarking Method* Mr. Tommaso Di Fonzo, Mr. Marco Marini, 2012-06-01 Statistical offices have often recourse to benchmarking methods for compiling quarterly national accounts QNA Benchmarking methods employ quarterly indicator series i to distribute annual more reliable series of national accounts and ii to extrapolate the most recent quarters not yet covered by annual benchmarks The Proportional First Differences PFD benchmarking method proposed by Denton 1971 is a widely used solution for distribution but in extrapolation it may suffer when the movements in the indicator series do not match consistently the movements in the target annual benchmarks For this reason an enhanced formula for extrapolation was recommended by the IMF's Quarterly National Accounts Manual Concepts Data Sources and Compilation 2001 We discuss the rationale behind this technique and propose a matrix formulation of it In addition we present applications of the enhanced formula to artificial and real life benchmarking examples showing how the extrapolations for the most recent quarters can be improved      Response to Intervention in Math Paul J.
