Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. There are eight markers in a full set, but Flora and Frank each only have seven markers. Flora is missing the red marker, and Frank is missing the blue marker.
What can they do so that each has a full set of markers? They should share Markers to have a full set.
2. Otto and Olivia each have six markers. Otto is missing the purple and green markers, and Olivia is missing the black and brown markers. What can they do so that each has a full set? The should share markers to have a full set.

Gizmo Warm-up

Just like the students described above, **nonmetal** atoms can share electrons. As you will see in the *Covalent Bonds* Gizmo, atoms form bonds in this way.

To begin, check that **Fluorine** is selected from the **Select a substance** menu. Click **Play** (▶) to see the electrons orbiting the nucleus of each atom.

1. The outermost electrons in each atom are called **valence electrons**. How many valence electrons does each fluorine atom have? 7 Valence electrons
2. Click **Pause** (⏸). Drag a valence electron from the left atom to the right atom. Click **Play**. What happens? A shell is added that connects the two atoms.
3. Click **Pause**, drag a valence electron from the right atom to the left, and then click **Play**. What happens now? An electron is added to the shell that is connecting the two atoms.

Reading Actively in Middle Grade Science Don K. Philpot,2020-09-15 Middle grade students can learn a great deal about themselves and their world by reading informative texts in science courses. These texts will focus on important topics in earth science, life science, and physical science, and shape students' understandings about scientific inquiry, science related processes and phenomena, engineering and design, and technological innovations. But reading is a complex act, and most students need specific reading related support to understand assigned texts in middle grade science courses. This book focuses on the cyclical nature of reading the actions proficient readers engage in to understand science textbooks and other informational texts, and the instructional support that teachers can provide to enhance middle grade students' learning of science content through reading. Three associated questions will be addressed in this book: What actions do proficient readers engage in to understand assigned course texts? What do these actions entail and how do they relate to each other? What teacher mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading.
