Apex Econ Ch 6 Review:

Behavioral Public Choice Economics and the Law Eric C. Ip, 2022-10-20 This book provides an accessible introduction to the emerging field of behavioral public choice economics and the law This field studies how public officials lawmakers and judges fall prey to their own biases and heuristics and how constitutions and judicial doctrines can be structured to mitigate these cognitive shortcomings Written lucidly in plain language this book is invaluable to all students scholars and general readers interested in behavioral economics law and economics and political economy

Revisiting the Energy-Development Link Kostas Bithas, Panos Kalimeris, 2015-12-12 Unravelling the intricate relationship between economic development and energy consumption this book proposes an innovative framework for the empirical investigation of the link between the economy and natural resources It proposes a novel set of indicators to shed light on those aspects of the economic process and development that determine their requirements in terms of natural resources Employing updated databases this book presents tables and diagrams to compare the conventional and the new estimates of the linkage between energy and economic development Energy Intensity throughout the world over the last 100 years Whereas estimates based on the established framework for evaluating the link between energy resources and the economy indicate a strong decoupling trend the new indicators follow substantially different paths which suggest a strong coupling between economic growth and energy use These differences which call into question the prevailing opinion of decoupling are fundamental for the prospects of sustainability This book provides a valuable resource for economists energy and environmental analysts natural resource managers and policy makers It is also intended for students of ecological economics sustainability studies natural resource and energy economics

Sustainable Development Felix Rauschmayer, Ines Omann, Johannes Fröhmann, 2012-07-26 This groundbreaking new work establishes links between sustainable development needs well being and the capabilities approach that is central to human development and the United Nations Development Programme By challenging the role of people in sustainability policy this collection s argument refocuses sustainable development on needs and makes it easier for people to relate positively to its core values This exciting new book incites a whole new way of looking at sustainable development Even though the word needs is central to the most popular definition of sustainable development the concepts of needs and capabilities remain within the debate on human development without going further into intergenerational justice or environmental protection The discussion of needs reaches non academics in a more direct way than talking about abstract thresholds substitutability and other issues dear to

academic debate on sustainability This collection links the questions of intra and intergenerational justice with issues of quality of life life courses and well being Dealing with needs entails dealing with deeper layers of consciousness revealing emotions and questioning habits and values In this way the collection presents an opportunity for substantial social change as well as a challenge for research and policy making This thought provoking collection asks its readers to reconsider the role of needs based on the philosophical arguments presented to understand how sustainability can become a part of the capability approach to better consider the dependency of life chances on birth contingencies and to see the relationship between capabilities needs and well being in a different light The editors finish by clarifying the possibilities and challenges of a needs based sustainability policy for policy makers and explain the role of deeply held values This book should be of interest to postgraduates and researchers in Environmental and Ecological Economics as well as many other disciplines including Political Economics Social Ecology Human Ecology Sustainability Science and Developmental Politics
