Dans les maisons d'habitation à niveau unique et à plusieurs niveaux ainsi que dans les immeubles d'habitation équipés de systèmes de détecteurs de fumée similaires, il est possible que les signaux émis par des capteurs sans fil soient bloqués ou réfléchis par le métal avant d'atteindre le panneau de commande du détecteur et ce, même si le parcours du signal a été récemment vérifié au cours d'un test hebdomadaire. Un blocage peut se produire si un objet métallique a été déplacé dans le parcours du signal du capteur.

## 51000-355/51000-357 Wireless Smoke Heat Alarm Installation Guide

**ATTENTION:** This manual should be read prior to use and retained for further information.

### GENERAL INFORMATION

The Wireless Smoke Heat Alarm is a 3xAAA battery powered wireless detector intended for use with a compatible wireless alarm system. The detector has a built-in wireless transmitter which communicates with the control panel. When smoke is detected, the alarm sounds a loud local alarm and the built-in transmitter sends a signal to the control panel. The Wireless Smoke Heat Alarm contains an integrated fixed 41°F temperature freeze sensor that will send a warning signal based on temperature detected. This detector is designed to provide protection with 70-foot spacing capability.

The detector can send alarm, tamper and battery condition messages to the system's receiver. Refer to the wireless system's instruction for the maximum number of transmitters that can be supported.

### CONTENTS OF BOX:

- Wireless Smoke Heat Alarm with base
- Installation guide (APD0601)
- Pack of screws and anchors
- Labels or decals as appropriate
- 3 AAA PC2400 Duracell Procell batteries (1.5V 1100mAh) or 3 AAA Energizer® batteries (1.5V 1100mAh)

The Wireless Smoke Heat Alarm contains a sounder which generates the ANSI S147 temporal 3 pattern in an alarm condition. In alarm, a message is also sent to the control panel and the detector's ID is displayed at the console. During an alarm condition, pressing the detector's hush button will silence the sounder (see table below). The mounting base installation is simplified by the incorporation of features compatible for both drywall fasteners (not supplied) and other methods.

Tricolored LED (red, yellow, green) and a sounder on the detector provide local visual and audible indication of the detector's status as listed in Table 1.

During initial power-up the LED blinks alternately red, yellow then green. It takes about 8 seconds for the detector to stabilize.

After power-up has completed and the detector is functioning normally, the green LED blinks once every 12 seconds.

**Detector Trouble:** When the detector has a general fault, the yellow LED blinks once every four seconds and there is a chirp every 48 seconds. After 12 hours the panel will display a loss of supervision message.
