**Diagnosing Internet Connection Issues** Rob Pember, 2020-06-09 We rely so much on the Internet that when our connection goes down or behaves very slowly it is not only very frustrating but has an impact on our business and personal lives. It's even worse if Internet connection problems are intermittent or on going. Getting to the bottom of WHY the problems are happening can be a needle in a haystack but having some basic understanding and things to test can help to identify whether the problem is with something at your premises the Internet Service Provider or in the case of Broadband Fibre the underlying phone network. This also saves time and frustration when contacting your Internet Service Provider as you can try things ahead of speaking to them instead of having to start from scratch. This topic is technical by nature but I've tried to break it down so you don't need loads of technical experience to make at least some progress. It is focused on Broadband and Fibre as these are what I had to deal with during my years of working in IT infrastructure but some of the principles could be applied to other forms of Internet such as cable. At the end of this book I touch upon issues relating to Wi-Fi and also the idea of a Backup Internet Connection so you can keep working when your main Internet connection goes down. Ultimately no one wants to waste time and energy dealing with Internet problems which is why I'm sharing my experience in this book get your copy today [Open Problems in Communication and Computation](#)

Thomas M. Cover, B. Gopinath, 2012-12-06 Thomas M. Cover and B. Gopinath The papers in this volume are the contributions to a special workshop on problems in communication and computation conducted in the summers of 1984 and 1985 in Morristown New Jersey and the summer of 1986 in Palo Alto California. The structure of this workshop was unique no recent results no surveys Instead we asked for outstanding open problems in the field. There are many famous open problems including the question P NP the simplex conjecture in communication theory the capacity region of the broadcast channel and the two helper problem in information theory. Beyond these well defined problems are certain grand research goals What is the general theory of information flow in stochastic networks What is a comprehensive theory of computational complexity What about a unification of algorithmic complexity and computational complexity Is there a notion of energy free computation And if so where do information theory communication theory computer science and physics meet at the atomic level Is there a duality between computation and communication Finally what is the ultimate impact of algorithmic complexity on probability theory And what is its relationship to information theory The idea was to present problems on the first day try to solve them on the second day and present the solutions on the third day. In actual fact only one problem was solved during the meeting El Gamal's problem on noisy communication over a common line
