An Investigation Into the Comparability of Two Tests of English as a Foreign Language Lyle F. Bachman, 1995-03-16

This book documents a major study comparing the Cambridge First Certificate in English (FCE) with the Test of English as a Foreign Language (TOEFL) to investigate similarities in test content, candidature, and use. While both tests were designed to measure many of the same abilities, they represent radically different approaches to language test development, reflecting deeper differences between educational measurement traditions in the US and UK. The thorough investigation of the fundamental characteristics and operational utility of two of the most widely used English tests for foreign students makes this study a valuable contribution to language testing research. As such, it will be of considerable interest to language testing specialists and examination boards as well as to academic researchers and graduate students in the field of language assessment more generally. *SEC Docket*, United States Securities and Exchange Commission, 1992. Engineers' Guide to Technical Writing, Kenneth G.

Budinski, 2001-01-01. Annotation: An engineer with experience in the automotive and chemical process industries, Budinski has compiled material he used to train new engineers and technicians in an attempt to get his co-workers to document their work in a reasonable manner. He does not focus on the mechanics of the English language but on the types of documents that an average technical person will encounter in business, government, or industry. He also thinks that students with no technical background should be able to benefit from the tutorial. c. Book News Inc.
