**Europe's Functional Constitution** Turkuler Isiksel,2016 Constitutionalism has become a byword for legitimate government but is it fated to lose its relevance as constitutional states relinquish power to international institutions This book evaluates the extent to which constitutionalism as an empirical idea and normative ideal can be adapted to institutions beyond the state by surveying the sophisticated legal and political system of the European Union Having originated in a series of agreements between states the EU has acquired important constitutional features like judicial review protections for individual rights and a hierarchy of norms Nonetheless it confounds traditional models of constitutional rule to the extent that its claim to authority rests on the promise of economic prosperity and technocratic competence rather than on the democratic will of citizens Critically appraising the European Union and its legal system this book proposes the idea of functional constitutionalism to describe this distinctive configuration of public power Although the EU is the most advanced instance of functional constitutionalism to date understanding this pragmatic mode of constitutional authority is essential for assessing contemporary international economic governance     **Fundamental Labour Rights and the Constitution** Giulia Frosecchi,2023-07-05 The book reflects on constitutional balancing from the perspective of fundamental labour rights It draws on neo constitutional theories and builds on the assumption that fundamental labour rights understood as rights aimed at protecting workers during their working life or after retirement are the normative expression of founding values and can be balanced against equally axiological constitutional principles The balancing of constitutional labour rights can be conducted by various institutional actors and by applying different techniques This volume reviews the theoretical debates on

judicial balancing and the approaches adopted by the Court of Justice of the European Union and the European Court of Human Rights to proceed with a closer assessment of Italian and Spanish judicial traditions In particular it addresses the main profiles of the case law of the Italian and Spanish Constitutional Courts on labour and social law reforms adopted in the aftermath of the 2008 crisis where balancing takes place between labour rights and economic principles The analysis is focused on four main aspects the fundamental labour rights in the balance the role of the Courts the technique applied by the Judges and the constitutional interests subject to the balancing It ultimately reveals that the axiological nature of fundamental labour rights is preserved and the economic and financial contingencies confirm their factual character although they are occasionally recognised a prominent role in the ratio decidendi The book will be a valuable resource for academics and researchers working in the areas of labour law social security law legal theory and constitutional law
