9 2 Practice Reflection:

(Re)learning as Reflective Practitioners Linley Cornish, 2024-07-15 This book examines significant developments in reflective practice delving into research conducted with novice teachers. It fills a gap in existing literature by examining the how of reflective practice. How do professionals learn reflective practice, fostering relearning? How do they guide students, mentees, and novices in adopting reflective practices? Stemming from teacher education, the focus is extended beyond this field, emphasizing the relevance of these strategies across professions. It is divided into three parts: thinking about reflection, learning to reflect, and becoming a reflective practitioner. It offers fresh perspectives on conceptualizing reflective practice and suggests practical strategies for integrating it into pre-service coursework, assessment, training, and development. Intended for academics, practitioners, and educators across disciplines, this book serves as a comprehensive guide for anyone committed to fostering reflective practice within their professional sphere.

Clinical Decision Making in Complementary & Alternative Medicine Matthew Leach, 2010-07-16 There are few published texts that address professional practice issues in complementary and alternative medicine (CAM). There are no known works that describe a clinical framework for CAM practice. The majority of texts on CAM to date explore the use or efficacy of specific CAM interventions, and whilst the proposed text will also highlight evidence-based interventions, it will also inform practitioners how to apply these interventions within a clinical decision-making framework. Introduces a systematic framework to CAM clinical practice. Focus on evidence-based practice without ignoring the underlying philosophy of complementary and alternative medicine. Includes learning objectives and learning activities to not only consolidate reader knowledge but to assist educators to effectively teach the process to students of CAM. Enables CAM practitioners to systematically assess, diagnose, treat, and evaluate client-centred health problems in accordance with CAM art, science, and philosophy. Guides CAM practitioner thinking, assessment, and care, which may help to increase professional autonomy and practitioner accountability, improve client outcomes, and quality of care, and reduce decision-making error. *Clinical Decision Making in Complementary Alternative Medicine* is also unique in that it focuses on evidence-based practice while also paying attention to the underlying philosophy of complementary and alternative medicine. Includes learning objectives and activities to consolidate reader knowledge and help lecturers teaching complementary and alternative medicine students. Enables complementary and alternative medicine practitioners to systematically assess, diagnose, treat, and evaluate client-centred health problems in accordance with the established art, science, and philosophy of complementary and alternative medicine. Guides practitioner thinking, assessment, and care, all of which may help increase professional autonomy and accountability, improve client outcomes, and quality of care, and reduce errors in decision making.
