Vibrio ecology, pathogenesis and evolution Rita R Colwell, Daniela Ceccarelli, 2014-10-24 Vibrios are Gram negative bacilli that occur naturally in marine, estuarine and freshwater systems. Some species include human and animal pathogens capable of causing gastroenteritis, wound infections, cholera and fatal septicemia. Over the past decades, cutting edge research on Vibrio genomics has promoted a tremendous advance in our knowledge of these pathogens. Significant developments include the discovery of emerging epidemic clones, tracking the spread of new strain variants and an intensified appreciation of the role of mobile genetic elements in antibiotic resistance spread, as well as pathogenesis. Furthermore, improved understanding of the interaction of Vibrios with a variety of living organisms in the aquatic environment has documented the significant role of environmental reservoirs in their seasonal cycle, favoring persistence of the pathogen during inter epidemic periods and enhancing disease transmission. This Research Topic is dedicated to our current understanding in these areas and will bring together leading experts in the field to provide a deep overview of Vibrios ecology and evolution and will suggest the pathway of future research in this field.

This book analyses the mismatches in democratic theories and between theory and practice in British representative democracy.

The City Record, 1892 *Why States Recover* Greg Mills, 2014 State failure takes many forms. Somalia offers one extreme: a collapse of central authority as the outcome of a prolonged civil war where authority descends into competing factions, warlords around the spoils of local commerce, power and international aid. At the other end of the scale is Malawi under President Bingu. During his abbreviated second term in office, the country's economy collapsed as a result of poor policies and personalised politics. On the surface, save the petrol queues, it was stable; underneath, the polity was fractured and the economy broken. Between these two extremes of state failure are all manner of examples. This book uses field work based case studies of more than thirty countries, incorporating interviews with a dozen leaders, to disaggregate various state failures and identify instances of recovery from Latin America, Asia and Africa, including Afghanistan, Congo, Sierra Leone, Kosovo, Somalia and Somaliland, Venezuela and Zimbabwe, while focusing on a key question: How do countries recover and
