

HOW TO READ A SAFETY DATA SHEET

OSHA Brief

The Hazard Communication Standard (HCS) (29 CFR 1910.1201), revised in 2012, requires that the chemical manufacturer, distributor, or importer provide Safety Data Sheets (SDSs) (formerly MSDSs or Material Safety Data Sheets) for each hazardous chemical to be shipped, stored, or handled by the chemical. This information contained on the SDS must be in English (although it may be in other languages as well). In addition, OSHA requires that SDSs prominently provide specific information as detailed in Appendix C of 29 CFR 1910.1201. The SDS program may also include other information as required by state or local law.

The SDS includes information such as the properties of each chemical, its physical, health, and environmental health hazards, protective measures, and safety precautions for handling, storage, and transport of the chemical. This information contained on the SDS must be in English (although it may be in other languages as well). In addition, OSHA requires that SDSs prominently provide specific information as detailed in Appendix C of 29 CFR 1910.1201. The SDS program may also include other information as required by state or local law.

Hazard Communication Standard Safety Data Sheet Sections 1 through 8 contain general information about the chemical, identification, hazards, classification, safe handling practices, and emergency-control measures. This information should be helpful to those that need to get the information quickly. Sections 9 through 12, 14, and 15 contain either technical and/or scientific information and chemical properties, risks and reactivity information, toxicological information, exposure control information, and other information including the state of preparation or use. The SDS must also state that the applicable information is used when the product does not have relevant information for any required element.

The SDS must also contain Sections 13 through 15, to be consistent with the GHS Globally Harmonized System of Classification and Labeling of Chemicals (GHS), but OSHA will not enforce the content of these sections because they contain matters handled by other agencies.
