Research Russell Gersten, Ellen P. Schiller, Sharon R. Vaughn, 2000-03-01 Considerable research in the past 30 years has accumulated regarding the academic and social functioning of youngsters with disabilities. Only in the past decade has there been sufficient special education research published from which meta-analyses and syntheses can be conducted. In this volume, seven sets of authors grapple with synthesizing the knowledge base on an array of critical topics in the field of special education. Among others, specific chapters include a synthesis of what is known about effective instructional grouping practices for reading, an examination of the differences between students classified as learning disabled and other low-achieving students on a range of academic performance measures, a review of effective instruction for English language learners, an examination of the research on behavioral supports for low-incidence special education populations, a synthesis on how technology supports literacy development across the full spectrum of disabilities categories. These papers provide up-to-date informative summaries of current knowledge and a base from which further venture into the critical area of instructional intervention in special education can occur. *Classroom Strategies for Interactive Learning* Doug Buehl, 2017 Educators across content areas have turned to *Classroom Strategies for Interactive Learning* for almost two decades. This fully updated fourth edition delivers rich, practical, research-based strategies that readers have found invaluable in the context of today's classrooms. Doug has written all new chapters that focus on the instructional shifts taking place as the Common Core State Standards are implemented across the United States. These introductory chapters will help you do the following: Understand the research base for comprehension strategies in content classrooms; Learn how to tap into students' background knowledge to enhance comprehension of complex texts and build new knowledge; Show learners how to question a text; Teach reading and thinking through a disciplinary lens. At the heart of this edition are more than forty classroom strategies with variations and strategy indexes that identify the instructional focus of each strategy, pinpoint the text frames in play as students read and learn, and correlate students' comprehension processes across the phases of strategy implementation. In addition, each strategy is cross-referenced with the Common Core's reading, writing, speaking, listening, and language standards. *Student Study Guide to Accompany Abnormal Psychology* Gy Douglas Hindman (Clinical psychologist), Davison, 1986 **World History** Elisabeth Gaynor Ellis, Anthony Esler, 2014 **Your Compass for a New World** LIE, BRYM, 2004-05 Each chapter of this student study tool includes learning objectives, detailed chapter outlines, key terms, study activities, InfoTrac and Internet exercises, and practice tests consisting of approximately 20 multiple-choice and 10 true/false questions with answers and page references, as well as 5 short-answer and 5 essay questions.
