Description This is the suggested course sequence that allows one core area of science to be studied per semester You can
change the sequence of the semesters per the needs or interests of your student materials for each semester are independent
of one another to allow flexibility Semester 1 Medicine From surgery to vaccines man has made great strides in the field of
medicine Quality of life has improved dramatically in the last few decades alone and the future is bright But students must
not forget that God provided humans with minds and resources to bring about these advances A biblical perspective of
healing and the use of medicine provides the best foundation for treating diseases and injury In Exploring the History of
Medicine author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their
abilities to better mankind and give glory to God The fascinating history of medicine comes alive in this book providing
students with a healthy dose of facts mini biographies and vintage illustrations Semester 2 Biology The field of biology
focuses on living things from the smallest microscopic protozoa to the largest mammal In this book you will read and explore
the life of plants insects spiders and other arachnids life in water reptiles birds and mammals highlighting God s amazing
creation You will learn about biological classification how seeds spread around the world long term storage of energy how
biologists learned how the stomach digested food the plant that gave George de Mestral the idea of Velcro and so much more
For most of history biologists used the visible appearance of plants or animals to classify them They grouped plants or
animals with similar looking features into families Starting in the 1990 s biologists have extracted DNA and RNA from cells
as a guide to how plants or animals should be grouped Like visual structures these reveal the underlying design of creation
