Levine, David J. Zimmerman, 2010-10-15 A substantial number of American children experience poverty about 17 percent of those under the age of eighteen meet the

government's definition and the proportion is even greater within minority groups. Childhood poverty can have lifelong effects resulting in poor educational, labor market and physical and mental health outcomes for adults. These problems have long been recognized and there are numerous programs designed to alleviate or even eliminate poverty as these programs compete for scarce resources. It is important to develop a clear view of their impact as tools for poverty alleviation. Targeting Investments in Children tackles the problem of evaluating these programs by examining them using a common metric their impact on earnings in adulthood. The volume's contributors explore a variety of issues such as the effect of interventions targeted at children of different ages and study a range of programs including child care, after school care and drug prevention. The results will be invaluable to educational leaders and researchers as well as policy makers.

Online

Learning in Mathematics Education Karen Hollebrands, Robin Anderson, Kevin Oliver, 2021-10-27. This book brings together research from mathematics education and instructional design to describe the development and impact of online environments on prospective and practicing teachers learning to teach mathematics. The move to online learning has steadily increased over the past decade. Its most rapid movement occurring in 2020 with most instruction taking place remotely. Chapters in this book highlight issues related to teacher learning in three main contexts formal, informal and experiential or practice based. This volume brings together researchers from the different but related fields of instructional design and mathematics education to engage in dialogue around how we design and study the impacts of online learning in general and online mathematics education more specifically. The book is very timely with most instruction taking place online and mathematics educators addressing challenges related to supporting teachers formal, informal and experiential learning online. A chapter in each section will synthesize ideas presented by instructional designers and mathematics educators as it relates to teacher learning in each context. At the end of each section a retrospective chapter is presented to reflect on what the different perspectives offer to better understand mathematics teacher learning in online environments. This book is of interest to mathematics educators, researchers, teacher educators, professional development providers and instructional designers.
