**Learning from Singapore** Pak Tee Ng, 2017-01-12 Learning from Singapore tells the inside story of the country's journey in transforming its education system from a struggling one to one that is hailed internationally as effective and successful. It is a story not of the glory of international test results but of the hard work and tenacity of a few generations of policy makers, practitioners and teacher trainers. Despite its success, Singapore continues to reform its education system and is willing to deal with difficult issues and challenges of change. Citing Singapore's transformation, author Pak Tee Ng highlights how context and culture affect education policy formulation and implementation. Showing how difficult education reform can be when a system needs to negotiate between competing philosophies, significant trade-offs or paradoxical positions, this book explores the successes and struggles of the Singapore system and examines its future direction and areas of tension. The book also explores how national education systems can be strengthened by embracing the creative tensions generated by paradoxes such as the co-existence of timely change and timeless constants, centralisation and decentralisation, meritocracy and compassion, and teaching less and learning more. Learning from Singapore brings to the world the learning from Singapore: what Singapore has learned from half a century of educational change and encourages every education system to bring hope to and secure a future for the next generation.

**The 7Cs of Coaching** Bruce Grimley, 2019-07-23 In *The 7Cs of Coaching*, Bruce Grimley expertly explains neuro-linguistic programming (NLP) to the advanced coach and counsellor by asking a simple question: What is NLP? Inviting us on his personal journey, he provides the reader in this book with an insight as to how he coaches using his own NLP model as well as exploring the complexity of NLP as a practice and why it tends to polarise opinion in today's coaching landscape. Grimley insists that if the NLP paradigm is to find credible traction in the modern world, it needs to test its claims in the same way as other academic disciplines. Based on his own research, this book does just that. Incorporating contemporary psychological understanding and neuroscientific research throughout, it provides a complete NLP model outlining specific steps for the reader to follow in order to achieve excellence in coaching. It includes case studies, exercises and reflective questions which will encourage both novice and advanced coaches to explore the benefits of NLP, understanding and taking into account emotions and the unconscious mind in their practice. By analysing the NLP landscape, this book also addresses many issues which are shared by the broader coaching community, such as differentiation from counselling, professional status and lack of a reliable empirical evidence base. Ground-breaking and thought-provoking, this book offers a modern examination of NLP. Highlighting why NLP is still useful and popular and exploring why it fills a gap in the marketplace for effective coaching, this book will be essential reading for all coaches in practice and training, coach supervisors and counsellors with an interest in coaching techniques.
