*Chinese Students in UK Further Education* Rosemary A. Reynolds,2017-12-15 Chinese students in the UK have been increasing in number for many years yet competition from other Western educators and increasing investment in China's own education system has led to concern that UK institutions may soon see a decline in their market share Dr Reynolds addresses this issue in Chinese Students in UK Further Education by attempting to understand students' experiences from their perspective Beginning with an exploration of why these students choose to come and study in the UK and why they are coming at younger ages the book goes on to discuss topics such as risk technology and diversity in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an institution Drawing on data from two different education institutions providers of GCSE A level programmes for students aged 16-18 years Dr Reynolds attempts to understand what these students experience during their studies how they manage new social relationships and whether upon course completion they achieved the results they desired at the outset Moreover the book aims to ascertain whether the students feel in hindsight that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere The book examines what further education institutions do well and where they might improve to help develop Chinese students' educational experiences As such it will be essential reading for academics researchers and postgraduates in the fields of further education sociology of education international and intercultural education and mobility studies

*Validating Technological Innovation* David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations Given that Hong Kong leads the way in OSM innovation this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong The authors discuss their experience of the validation process demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders

Novikov,2021-07-28 In the modern world most gross product is created within Enterprise firms project programs state agencies transnational corporations and their divisions as well as various associations and compositions of the above entities Enterprises being on the one hand complex and on the other hand widespread systems are the subject matter of cybernetics system theory operations research management sciences and many other fields of knowledge However the complexity of the system obstructs the development of mathematically rigorous foundations for Enterprise control Moreover methods of operations research and related sciences which are widely used in practice provide optimization of the constituents of an Enterprise without modeling it as a whole system But the optimization of parts does not lead to the optimality of the whole

and also the absence of top down and holistic mathematical models of Enterprise contradicts the principle of holism and the system approach The approach in this book looks first at Enterprise Systems and their essential aspects as complex sociotechnical systems composed of integrated sets of structural and process models Chapters 1 and 2 A uniform description of all the heterogeneous fields of the modern Enterprise marketing sales manufacturing HR finance etc is then made and the Enterprise Control Problem is posed as a top down and holistic mathematical optimization problem Chapter 3 Original models and methods of contract theory Chapter 4 technology management Chapter 5 human behavior and human capital Chapter 6 and complex activity and resource planning Chapter 7 are developed to solve the problem Structural processes and mathematical models constitute an Optimal Enterprise Control Framework Chapter 8 that provides a practical solution to the Enterprise Control Problem This book is a resource for postgraduate and doctoral students postdoctoral researchers and professors with research interests in the following fields of science Fundamental Complex Systems study Complex Systems Engineering Enterprise Systems Engineering Applications of Operations Research Optimization Probability and Stochastic processes to Management Science Economics and Business Theory of the Firm Business and Management general strategy leadership organization management operations management and management information systems Theory of Business Processes Business Processes Improvement and Reengineering     National Union Catalog of Manuscript Collections ,1965 Based on reports from American repositories of manuscripts     The College Handbook ,1995
