**Fire Science and Technology 2015** Kazunori Harada,Ken Matsuyama,Keisuke Himoto,Yuji Nakamura,Kaoru Wakatsuki,2016-10-04 This book focuses on topics in the entire spectrum of fire safety science targeting research in fires explosions combustion science heat transfer fluid dynamics risk analysis structural engineering and other subjects The book contributes to a gain in advanced scientific knowledge and presents or advances new ideas in all topics in fire safety science Two decades ago the 1st Asia Oceania Symposium on Fire Science and Technology was held in Hefei China Since then the Asia Oceania Symposia have grown in size and quality This book reflecting that growth helps readers to understand fire safety technology design and methodology in diverse areas including historical buildings photovoltaic panels batteries and electric vehicles

*The 1940 Vrancea Earthquake. Issues, Insights and Lessons Learnt* Radu Vacareanu,Constantin Ionescu,2016-03-02 These proceedings include most of the available information on this major seismic event and its consequences With an estimated moment magnitude of 7.7 and a heavy toll in terms of human and economic losses it ranks as the largest intermediate depth earthquake in Europe in the twentieth century Nevertheless because of the difficult conditions in the 1940s the lessons learnt after the Vrancea earthquake were not extensively shared with the international scientific community and thus this book fills a gap in the literature discussing the knowledge acquired after major disasters Past experience together with current understanding of the 1940 Vrancea earthquake are presented along with the latest information on Romanian seismicity seismic hazard and risk assessment and seismic evaluation and rehabilitation of buildings and structures Moreover it includes excerpts from Romanian post disaster reports and textbooks concerning the earthquake

**Technology and Science for the Ships of the Future** Alberto Marinò,2018-06-15 In 1974 a scientific conference covering marine automation group and large vessels issues was organized under the patronage of the Technical Naval Studies Centre CETENA and the Italian National Research Council CNR A later collaboration with the Marine Technical Association ATENA led to the renaming of the conference as NAV extending the topics covered to the technical field previously covered by ATENA national conferences The NAV conference is now held every 3 years and attracts specialists from all over the world This book presents the proceedings of NAV 2018 held in Trieste Italy in June 2018 The book contains 70 scientific papers 35 technical papers and 16 reviews and subjects covered include comfort on board conceptual and practical ship design deep sea mining and marine robotics protection of the environment renewable marine energy design and engineering of offshore vessels digitalization unmanned vehicles and cyber security yacht and pleasure craft design and inland waterway vessels With its comprehensive coverage of scientific and technical maritime issues the book will be of interest to all those involved in this important industry

**Gale's Auto Sourcebook 2** Karen Hill,1992-05 This book is designed to present in one convenient source comments published in periodicals about 325 automobile models manufactured since 1987 on a model by model basis These periodicals range from general interest to specialized sources as

well as repair manuals and other publications related to the individual models [The Handbook of Formal Methods in Human-Computer Interaction](#) Benjamin Weyers,Judy Bowen,Alan Dix,Philippe Palanque,2017-04-24 This book provides a comprehensive collection of methods and approaches for using formal methods within Human Computer Interaction HCI research the use of which is a prerequisite for usability and user experience UX when engineering interactive systems World leading researchers present methods tools and techniques to design and develop reliable interactive systems offering an extensive discussion of the current state of the art with case studies which highlight relevant scenarios and topics in HCI as well as presenting current trends and gaps in research and future opportunities and developments within this emerging field The Handbook of Formal Methods in Human Computer Interaction is intended for HCI researchers and engineers of interactive systems interested in facilitating formal methods into their research or practical work [Validation and Reconstruction of Remote Sensing Land Surface Temperature Products](#) Wenping Yu,Yuechen Li,Xujun Han,Lei Fan,Wei Zhou,Mingguo Ma,Weiyu Shi,2024-07-30 This book focuses on validation and reconstruction work on the land surface temperature LST products retrieved by thermal infrared remote sensing The LST is a key parameter in the energy water balance process and has been widely used in research on the global climate change water cycle vegetation growing and drought detection Remote sensing retrieving LST is the most important source for regional and even global application However there are several factors that limited their widespread use 1 the thermal infrared remote sensing is easily influenced by clouds therefore there are lots of pixel with invalid LST 2 LST products have not been sufficiently validated in global scale This book aims to overcome above defects and guide the readers to estimate the LST of cloudy pixel and implement the general validation on the remote sensing LST Furthermore it helps to understand the scale mismatch between different observation and land surface heterogeneity The book covers ground based observation validation and reconstruction theories scale mismatch analysis heterogeneity and representativeness evaluation for observations and application cases It is an essential reference to the quantitative retrieval of thermal infrared remote sensing technologies

**Crowd Dynamics, Volume 1** Livio Gibelli,Nicola Bellomo,2019-01-22 This volume explores the complex problems that arise in the modeling and simulation of crowd dynamics in order to present the state of the art of this emerging field and contribute to future research activities Experts in various areas apply their unique perspectives to specific aspects of crowd dynamics covering the topic from multiple angles These include a demonstration of how virtual reality may solve dilemmas in collecting empirical data a detailed study on pedestrian movement in smoke filled environments a presentation of one dimensional conservation laws with point constraints on the flux a collection of new ideas on the modeling of crowd dynamics at the microscopic scale and others Applied mathematicians interested in crowd dynamics pedestrian movement traffic flow modeling urban planning and other topics will find this volume a valuable resource Additionally researchers in social psychology architecture and engineering may find this information relevant to their work [Microwave Radiation of the](#)

Ocean-Atmosphere Alexander G. Grankov,Alexander A. Milshin,2015-12-18 The book describes different approaches to the analysis of heat and dynamic processes in the ocean atmospheric interface with satellite passive radiometric observations at microwaves It examines the feasibility of determining synoptic seasonal and year to year variations of sensible latent and momentum fluxes to a useful accuracy using the DMSP SSM I and EOS Aqua AMSR E data directly from the measured brightness temperatures An important object in the studies is the North Atlantic with emphasize on the areas with high midlatitude cyclon activity here the main results have been obtained by combining data from the vessel experiments NEWFOUEX 88 ATLANTEX 90 and the data of microwave radiometers from the DMSP and EOS Aqua satellites The role of vertical turbulent and horizontal advective heat transfer in forming interrelations between the brightness temperature of the system ocean atmosphere and surface heat fluxes in the range of synoptic time scales is analyzed Special sections of the book describe some results of analysis of reaction of the system ocean atmosphere on passing of the tropical cyclone Katrina August 2005 in the Florida Strait as well as a behavior of the system in the period of a time preceding to origination the cyclone Humberto September 2007 in the Mexico Gulf The long term goal of this research is the search for effects and regularities which can explain the reasons for the tropical cyclones appearance Some characteristics of the tropical cyclones brightness temperature and heat contrasts etc are compared with those for midlatitude cyclones At the same time as covering a key topic area with implications for global warming research this text is also usefull to students who want to gain insight into application of satellite microwave radiometric methods for studying the air sea interaction Key themes microwave radiometry air sea interaction midlatitude and tropical cyclones atmosphere boundary layer heat and momentum surface fluxes

**Proceedings ,2002      Grasslands of the World**

Victor R. Squires,Jürgen Dengler,Limin Hua,Haiying Feng,2018-09-05 This book begins with a brief account of the extraordinary sequence of events that led to emergence of grasslands as major vegetation formations that now occupy some of the driest and hottest and the highest and coldest on earth as well as vast steppes and prairies in more temperate climes It is the story of grasses successfully competing with forests and woodlands aided and abetted by grazing herbivores and by humans and their use of fire as a tool It is a story of adaptation to changing climates and the changing biophysical

environments A major focus of the book is the Palaearctic biogeographic realm that extends over some 45 million km<sup>2</sup> and thus more than 1/3 of the terrestrial ice free surface on Earth. It comprises extensive grasslands of different types and origin which can be subdivided into 1 natural grasslands with 1a steppes climatogenic in dry climates 1b arctic alpine grasslands climatogenic in cold climates and 1c azonal and extrazonal grasslands pedogenic and topogenic as well as 2 secondary grasslands created and sustained by human activities such as livestock grazing, mowing or burning. Grasslands of the Palaearctic do not only form a major basis for the agriculture of the region and thus its food supply but are also crucial for other ecosystem services and host a supra proportional part of the realm's plant and animal diversity. To reflect that suitability of grasslands for biodiversity strongly depends on their state we apply the term High Nature Value grassland to those natural grasslands that are not degraded in good state and those secondary grasslands that are not intensified semi natural. The situation in a variety of countries where grasslands are evolving under the influence of global climate change is also considered. Case studies are presented on Southern Africa, Eastern Africa, India, China, South America, North America and Australia. The concluding chapter examines a set of themes arising from the chapters that make up the bulk of this book. The following provide a focus: recent history of grassland biomes, brief recap of current thinking and recent trends with special reference to dry grasslands in the Palearctic regions, the current status of grasslands and germplasm resources, biodiversity, an overview management systems that ensure sustainability, how to recover degraded grasslands, socio-economic issues and considerations in grassland management, the impacts of environmental problems in grasslands such as future climate change and intensification and the problems prospects facing pastoralists and other grassland based livestock producers.
