Handbook of Food and Feed from Microalgae Eduardo Jacob-Lopes, Maria Isabel Queiroz, Mariana Manzoni Maroneze, Leila Queiroz Zepka, 2023-06-09 *Handbook of Food and Feed From Microalgae Production Application Regulation and Sustainability* is a comprehensive resource on all aspects of using microalgae in food and feed. This book covers applied processes including the utilization of compounds found in microalgae, the development of food products with microalgae biomass in their composition, the use of microalgae in animal nutrition and associated challenges and recent advances in this field. Written by global leading experts in microalgae, this book begins with the fundamentals of food and feed including microalgal biodiversity, biogeography and nutritional purposes. The book continues to describe compounds found within microalgae such as proteins, pigments and antioxidants. It explains the process incorporation of microalgae into meat, dairy, beverage and wheat products as well as real world food applications in finfish aquaculture, mollusk, poultry and pet feeding. The book concludes by discussing challenges and issues in the field encompassing bioavailability, bioaccessibility and how to address safety, regulatory, market economics and sustainability concerns. This book is a valuable resource for aquaculturists, food scientists and advanced undergraduate and graduate students interested in microalgae as a sustainable food and feed ingredient. Examines current data behind the food and feed production using microalgae based processes. Analyzes and details the use of microalgae across industries and disciplines. Addresses and offers solutions to safety, market, sustainability and economic issues.

Sustainable Engineering Israel Sunday Dunmade, Michael Olawale Daramola, Samuel Ayodele Iwarere, 2024-02-06 *Sustainable Engineering Concepts and Practices* provides insights into current perspectives on sustainable engineering research. It highlights the drivers, motivations and challenges affecting the development and adoption of sustainable engineering in various sectors of the economy and how they impact sustainable development. Contributions from researchers representing multiple branches of engineering in academia, government laboratories and industry present alternative approaches to traditional engineering practices. These approaches effect change, making the design, construction, production and management of products, processes and systems more environmentally friendly, socially beneficial and economically profitable. The book will be a trusted reference for graduate students, practicing engineers and other professionals interested in developing or using sustainable products and systems.

Root, Tuber and Banana Food System Innovations Graham Thiele, Michael Friedmann, Hugo Campos, Vivian Polar, Jeffery W. Bentley, 2022-04-06 This open access book describes recent innovations in food systems based on root, tuber and banana crops in developing countries. These innovations respond to many of the challenges facing these vital crops, linked to their vegetative seed and bulky and perishable produce. The innovations create value, food, jobs and new sources of income while improving the wellbeing and quality of life of their users. Women are often key players in the production, processing and marketing of roots, tubers and bananas, so successful innovation needs to consider gender. These crops and their value chains have long been neglected by

research and development hence this book contributes to filling in the gap The book features many outcomes of the CGIAR Research Program in Roots Tubers and Banana RTB which operated from 2012-21 encompassing many tropical countries academic and industry partners multiple crops and major initiatives It describes the successful innovation model developed by RTB that brings together diverse partners and organizations to create value for the end users and to generate positive economic and social outcomes RTB has accelerated the scaling of innovations to reach many end users cost effectively Though most of the book's examples and insights are from Africa they can be applied worldwide The book will be useful for decision makers designing policies to scale up agricultural solutions for researchers and extension specialists seeking practical ideas and for scholars of innovation Birds of Prey and Wind Farms Hermann Hötker, Oliver Krone, Georg Nehls, 2017-04-17 This book discusses the increase in number and capacity of wind farms in Germany and how this is affecting birds of prey Several methods are used to study the behaviour of birds of prey in relation to wind farms including telemetry data field observations and comparisons of turbine base areas Special attention is given to the effects on different bird species and the impact wind farms may have on population growth and breeding success of birds of prey Chapter 6 discusses the collision risks at wind turbines and provides an analysis of the fatalities In the concluding chapter ideas are put forward to help minimize conflicts estimate risks and offer practical recommendations for future research This book will be of interest to wind farm developers researchers applied ecologists and landscape planners
