

AP US Government and Politics Free Response #2

1) "The white man can lynch and burn and bomb and beat black citizens—that's all right: 'Have patience'... 'The customs are entrenched'... 'Things are getting better'... Well I believe it's a crime for anyone who is being brutalized to continue to accept that brutality without doing something to defend himself..."

I tried in every speech I made to clarify my new position regarding white people—I don't speak against the sincere, well-meaning, good white people...I am speaking against and my fight is against the white racists. I firmly believe that black citizens have the right to fight against these racists, by any means that are necessary.

I am for violence if non-violence means we continue postponing a solution to the American black man's problems—just to avoid violence. I don't go for non-violence if it also means a delayed solution. To me a delayed solution is a non-solution"

* Malcolm X, from *The Autobiography of Malcolm X* (1965)

After reading the above quotation, respond to A, B, and C below:

a) Identify a constitutional provision that supports Malcolm X's insistence on human rights for black citizens.
The equal protection clause of the 14th Amendment is the constitutional principle that supports Malcolm X's insistence on human rights for African-Americans.

b) Identify differences between Malcolm X's recommendation citizen-state interactions and the citizen-state interactions Dr. King describes in "*Letter from a Birmingham Jail*".
Malcolm X endorses violence if nonviolent protest only postpones progress, whereas Dr. King did not endorse violence in the letter, believing nonviolence was the best way to accomplish their goals.
Malcolm X believed it was a crime for a person who was being brutalized to continue to accept it without defending himself, while MLK trained his followers to accept this without fighting back.

c) Explain how Malcolm X's approach reflects the relationship between political behavior and the rule of law.
Malcolm X believes you shouldn't follow any law in your political behavior if the law discriminates based on race. He also says that violence is necessary if it is for self-defense and achieving their goal of equal rights.

American Politics and the Environment, Second Edition Byron W. Daynes, Glen Sussman, Jonathan P. West, 2016-03-01
Examines the role of politics in the environmental policy making process. Changing our environmental policy has been at the forefront of many political discussions. But how can we make this change come about? In *American Politics and the Environment* Second Edition, Byron W. Daynes, Glen Sussman, and Jonathan P. West argue it is critical that we must understand the politics of environmental decision making and how political actors operate within political institutions. Blending behavioral and institutional approaches, each chapter combines discussion of an institution along with sidebars focusing on a particular environmental topic as well as a personal profile of a key decision maker. A central focus of this second edition is the emergence of global climate change as a key issue. Although the scientific community can provide research findings to policy makers, politics can create conflicts, tensions, and delays in the crafting of effective and necessary environmental policy responses. Daynes, Sussman, and West help us understand the role of politics in the policy making process and why institutional players such as the president, Congress, and interest groups succeed or fail in responding to important environmental challenges.

Indigenous Responses to Mining in Post-Conflict Colombia Diana Carolina Arbeláez Ruiz, 2023-09-13
This book examines Indigenous responses to mining and their connection to peacebuilding, focusing on the experience of the Nasa Indigenous people of North Cauca during the most recent Colombian post-agreement transition. Amid an armed conflict that has disproportionately affected and targeted the Nasa as well as ongoing processes of dispossession and oppression, the Nasa have built a tradition of organised peaceful resistance. This book examines the nature of their responses to mining and how this is linked to peacebuilding, with a focus on how resistance is shaped and enacted to respond to the relationship mineral extraction has with violence and peace. The work is exploratory, ethnographic, and interdisciplinary in nature, sitting in the intersection between the anthropology of mining, development studies, and peace and conflict studies. The author presents and analyses narratives, participant responses, and her own experiences to illustrate the context and interconnected processes shaping Nasa responses to mining during this transition period. The book will bring international readers closer to these intricate dynamics, where access is otherwise limited because of security, cultural, linguistic, and other barriers. The book provides a novel perspective on post-conflict mining governance by focusing on the Nasa's active role in responding to mining in a post-agreement transitional context. It highlights and encourages engagement with the often overlooked role of morality in debates about nature and development. This book will be of great interest to students, scholars, and practitioners of the extractive industries, natural resource management, conflict management, and peacebuilding, Indigenous Peoples, and Latin American studies.

An

Introduction to Survey Research Ernest L. Cowles,Edward Nelson,2015-01-30 An Introduction to Survey Research is for those who want an overview of the survey process It is intended to describe fundamental survey components to help both students and managers understand and use surveys effectively and avoid the pitfalls stemming from bad survey construction

and inappropriate methods. The authors discuss how best to identify the information needed and the best approach to get that information. They also highlight the processes commonly involved in conducting a survey including the value of both obtaining a representative sample and dealing with the types of errors that can distort results. Each chapter focuses on one of the key components of constructing and carrying out a survey including the elements to consider when developing a survey, the modes of survey delivery, writing good questions, conducting the survey and presenting the results.

American Government Scott F. Abernathy, 2016-12-05. Real People Real Stories. Real Politics. Politics involves people from many backgrounds struggling to make their voices heard. Real people telling their stories reflect our ideals, choices and collective experiences as a nation. In *American Government Stories of a Nation*, author Scott Abernathy tunes in to these voices showing how our diverse ideas shape the way we participate and behave, the laws we live by and the challenges we face. Each chapter features real stories illustrating how the American political system is the product of strategies, calculations and miscalculations of countless individuals. Students learn the nuts and bolts of political science through these compelling stories. Learning concepts in context is a tested learning technique that works to help ideas stick. The key concepts are memorable because they are tied to real politics where students see political action and political choices shaping how institutions advance or impede the fulfillment of fundamental ideas. Not only will all students see themselves reflected in the pages but they will come to understand that they too are strategic players in American politics with voices that matter.
