Small Sample Size Solutions Rens van de Schoot, Milica Miočević, 2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics

Schools That Succeed Karin Chenoweth, 2020-01-15 Informed by years of research and on the ground reporting *Schools That Succeed* is Karin Chenoweth's most inspiring and compelling book yet an essential read for educators who seek to break the stubborn connection between academic achievement and socioeconomic status Chenoweth draws on her decade long journey into neighborhood schools where low income students and students of color are learning at unexpectedly high levels to reveal a key ingredient to their success in one way or another their leaders have confronted the traditional ways that schools are organized and have adopted new systems all focused on improvement In vivid profiles of once embattled schools Chenoweth shows how school leaders doggedly and patiently reorganized internal systems in order to prioritize teaching and learning resulting in improved outcomes that in many cases exceeded statewide averages From how they use time to how they use money schools that

succeed combine a deep belief in the capacity of their students to achieve with deliberate systems focused on student needs As a result they create vibrant places where teachers want to teach and students want to learn
