## **2014 Caps Grade 11 Life Science Exemplar:**

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

**Education in a New South Africa** Robert J. Balfour, 2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education, International Education Reform, and Language Education.

**Cry Freedom** James Tooley, 2024-05-10 A clarion call for academics and policymakers alike. Cry Freedom prompts reflection on the evolving relationship between government and higher education.

**Bulletin of the Atomic Scientists**, 1995-09      **Education in Vietnam** Martin Hayden, Thi Le Tran, 2024-08-02 Offering insights into the current and projected future state of the education system in Vietnam, this edited volume is an authoritative sourcebook for scholars, policy analysts, academic staff, and students. Vietnam is well on its way to joining the dress circle of high-achieving education nations in Asia. International surveys of the academic aptitude and ability of the nation's youth consistently place it well above relevant regional and global averages. This accomplishment is remarkable for a country with a gross domestic product per capita of only US 2 785 in 2020. The dynamics of Vietnam's national education system are comprehensively documented in the book. Each of the country's education sectors is critically appraised, as well as the culture of education in Vietnam. Specific issues concerning funding and equity, quality and accreditation, the teaching of curriculum areas, the internationalisation of the system, and the provision of educational opportunities for young people with disabilities are carefully analysed against a background of relevant global trends. With contributions from well-established and highly respected local experts with high aspirations for the future development of the national education system in Vietnam, this book will be a must-read for academics and students of Southeast Asian studies and comparative education.
