Tambari ,1999 *Handbook of Research on the Role of Human Factors in IT Project Management* Misra, Sanjay,Adewumi, Adewole,2019-09-27 The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive and organizational domain of computing yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The *Handbook of Research on the Role of Human Factors in IT Project Management* is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers and students seeking current research on the dynamics of human influence in technological projects. *Effects of Tutorial and Animated Media Instructional Strategies on Achievement and Retention of Secondary School Students in Computer Studies* Dr. Anusiuba Overcomer Ifeanyi Alex, Dr. Ashoka S. B., Paul, Roseline Uzoamaka, 2022-12-21. The study was led by six research questions and six hypotheses were examined at a significance level of 0.05. The quasi experimental design was used, notably the non equivalent control group design for the pretest and posttest. 4873 senior secondary school students in the Nnewi Education Zone of the state of Anambra make up the study's population. In the study, 273 percent of the population was used. A sample of 133 Nnewi Education Zone SS2 computer science students was used. The Computer Studies Department and one knowledgeable computer studies teacher from Nnewi Kudder Richardson Formula 20 was used to determine the instrument's reliability. The CSAT was used as a pretest and posttest to gather data. Three weeks following the post test, the retention test was given. The results demonstrated that a lesson followed by animated media education greatly improved students' computer science performance. When compared to the traditional approach, only tutorials considerably increased students' retention; however, this improvement was not significant when compared to animated media. The study concluded that tutorials are successful at raising students' achievement and retention. The use of animated material in the classroom has been shown to improve student achievement.

**"Ogbanje" Twins and Other Stories** Keemholems Ojei,2019-05-23 Ogbanje Twins and Other Stories

By Keemholems Ojei Ejime and Onyishi were born identical and quite brilliant twins Their birth process was witnessed by their helpless impoverished father in their sitting room The twins survived but their mother died just a few minutes after giving birth to them This tragedy could have been a mirror of their mother s nightmare a few nights before in which she was in communication with her late father who laid a curse upon her The pretty twins grew up motherless under the tutelage of their father Chris and a maid Their excellent results in pure sciences in their final high school exams catapulted them into the limelight from obscurity They secured double scholarships from the state and federal government to study Electronics Computer Engineering and Medicine respectively in Cambridge University Massachusetts USA But by the impulse of man s inhumanity to man the influence of fate and what appeared like the Ogbanje spirit wriggled out their ugly heads and needed God s urgent intervention In this direction the awkwardness of man s wickedness to man dimmed a somewhat bright light

**Assessment in Geographical Education: An International Perspective** Theresa Bourke,Reece Mills,Rod Lane,2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As

geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills *Jos Educational Forum* ,2009 **Africa Diary** ,1978 **Management in Nigeria** ,1986 **Daily Graphic** Ransford Tetteh,2011-02-23
