

Air Compressor

DUAL MATERIAL CONSTRUCTION

World's only compressor with a unique dual material construction

The cylinder block is made up of cast iron that prevents wear & tear thus imparting longevity to the unit.

Crankcase & cylinder head are made from aluminium – Compact design and choice of aluminium as a raw material helps in efficient cooling of the unit. Aluminium crankcase keeps the oil in the sump cooler thus enhancing the performance of the unit.

EFFICIENT VENTILATION

Larger flywheel keeps air directed towards the cylinder for faster heat dissipation & efficient ventilation.

High Pressure Cylinder with a higher temperature is placed closer to the flywheel which further helps in faster cooling of the unit.

Output tubing designed to pass from the front of the flywheel, further reducing the temperature of the air in the tank.

IN-LINE DESIGN

Compact & Superior to "V" type construction; air flow in the in-line design is directed towards both the cylinders uniformly keeping maximum temperature within check as compared to the "V" type construction where air flow is directed towards one side of the "V".

MOTOR

Class "F" insulation, motor is designed as per EURO norms.

AIR FILTER

Easy maintenance & replaceable sponge type air filter is easily washable.

BUILT IN STARTER

Protects the unit from sudden voltage fluctuation & enables usage with varying voltages.

INTERCOOLER

In multiple-stage version; Reduces the temperature of compressed air which improves efficiency by reducing power consumption.

BOLTED DESIGN BASE PLATE

Makes it convenient to assemble or dis-assemble the compressor unit from the tank. Bolted design also eliminates possibility of rust as compared to a welded design.

SAFETY VALVES

In-built safety valves for releasing excess pressure.

Oil sight glass for controlling the oil level.

Drainage port for emptying the condensate collected in the tank.

Caged belt and pulley assembly for enhanced safety in operation.
