Transforming Schools Using Project-Based Learning, Performance Assessment, and Common Core Standards Bob Lenz, Justin Wells, Sally Kingston, 2015-01-27
It's not what students know but what they do with what they know that is important. Schools are changing in response to this reality and in *Transforming Schools Using Project Based Learning Performance Assessment and Common Core Standards* Bob Lenz, Justin Wells and Sally Kingston draw on the example of the Envision Education schools as well as other leading schools around the country to show how the concept of deeper learning can meet the need for students who are both college and career ready and engaged in their own education. In this book the authors explain how project based learning can blend with Common Core aligned performance assessment for deeper learning. You'll discover how many schools have successfully made the transition from traditional teacher centered learning to project based deeper learning and find many practical ideas for implementation. Companion DVD and website include videos showing how to implement deeper learning strategies in the classroom. Evidence based descriptions show why deeper learning is right for students. Performance assessment experts explain how to align assessments with Common Core by shifting the emphasis from knowing to doing. Extensive game plan section provides step by step guidance for change. Schools are complex organizations and transformation involves all of the stakeholders from students to superintendents. But as this book shows there are amazing benefits to be realized when everyone commits to diving deeper into learning.
