Reconnecting Reading and Writing Alice S. Horning, Elizabeth W. Kraemer, 2013-09-06 Reconnecting Reading and Writing explores the ways in which reading can and should have a strong role in the teaching of writing in college Reconnecting Reading and Writing draws on broad perspectives from history and international work to show how and why reading should be reunited with writing in college and high school classrooms It presents an overview of relevant research on reading and how it can best be used to support and enhance writing instruction The Philosophy of Geology: a Brief Review of the Aim, Scope, and Character of Geological Inquiry David PAGE (F.G.S.), 1863 Critical Thinking for Sports Students Emily Ryall, 2010-04-26 A really useful textbook to help undergraduate students construct arguments in their writing and raise their writing abilities to a higher level The book also provides useful examples that relates to sports students Hassan Khalil Hertfordshire University A fantastic text and one we use regularly with undergraduate and postgraduates Abbe Brady Gloucestershire University The capacity to think critically is essential for success in sport courses in higher education This book provides all those involved in the study of sport with the tools to assess construct and present arguments and to analyse and evaluate material The emphasis is on the application of critical thinking in the form of written arguments discussion and negotiation Throughout the text and examples are presented within the context of sport helping students to more easily apply their learning to their subject area Sidgwickian Ethics David Phillips, 2011-11-25 David Phillips aims in Sidgwickian Ethics to do something that has surprisingly not been done before to interpret and evaluate the central argument of the Methods of Ethics in a way that brings out the important conceptual and historical connections between Sidgwick's views and contemporary moral philosophy Doing Effective Fieldwork Elia Shabani Mligo, 2013-03-13 We live in a context of change whereby postmodernity shapes our understanding and our searching for truth Postmodernity dictates not only what kind of results we obtain in our researches but also on the ways we use to search for truth This means that postmodernity dictates the ways we do research in various disciplines the ways we use to analyze the research results and the ways we use to communicate the findings Postmodernity is the paradigm in which we are greatly concerned What is the place of rules of research research ethics selection of the problem and designing of research as we consider the context whereby nothing absolute can be envisaged How should one review the literature to suit this postmodern understanding of reality How should one argue his or her case This book is designed to help students in higher learning institutions learn qualitative research methods in classrooms or by themselves It moves students and researchers from modern ways of understanding doing and communicating qualitative research towards postmodern challenges and promises In this case the book is worthy reading to every serious student and researcher who seeks to equip oneself to the current issues of qualitative research methodology **Tithes the Property of the Public and the Poor; a Legal Argument ...
