R. Gebman,2008 The structures making up

airframes must be durable and damage tolerant and the means of ensuring that they are have long been well defined for structures made of metal But a host of new hybrid materials some of which contain no metal are now being used and these can present new damage mechanisms that engineers must address The Air Force has established a general approach to airframe durability and damage tolerance The author examines that approach and considers ways it will need to adapt for the new materials Given the variety of materials processes and end uses involved the engineering effort will necessarily involve multiple specialties In these circumstances the tailoring process could benefit from the efforts of systems engineers The report addresses both technical and programmatic concerns and identifies opportunities for materials and structural engineers to collaborate with systems engineers Finally it offers a framework for collaboration *Delivering Excellent Service Quality in Aviation* Mario Kossmann, 2017-03-02 A practical and realistic guide for both external and internal service providers in an aviation context to implementing an effective way to control the service quality as perceived by their customers *Delivering Excellent Service Quality in Aviation* is essential for those service providers that are not yet systematically managing their service quality Offering a step by step and easy to understand framework it also enables those service providers that are already proactively managing their service quality to build new techniques into current practice for maximum effect By using this guide decision making as well as budget and capacity planning can be optimized and justified to any stakeholders in the service operation Customer satisfaction can be improved considerably over time and thereby profits or budget allocation for internal service providers Crucially the improvements the book provides can be systematically measured and easily disseminated throughout the organization leading to increased levels of motivation amongst staff
