Read the passage carefully. Identify if the given statements compares (CE) or contrasts (CT) the two characters.

Jen had a best friend whose name was also Jenn but with a double "n." They had beautiful brown eyes and blonde hair. But Jenn had long, wavy hair, while Jen had short, straight hair. They went to the same school and studied in the same class. They enjoyed playing sports together. They both excelled in their artistic talents, with a knack for drawing. One of them had a cat as a pet, while the other had a dog. They had different favorite colors, adding a unique touch to their friendship. They were responsible and often helped each other with homework. Coincidentally, their birthdays were in the same month. They loved their pets very much. Jenn took her cat wherever she went, while Jen's dog was her constant companion. However, tragedy struck when Jen forgot to close her dog's cage one day, and that was the last day she saw her pet. On the other hand, Jenn's cat brought joy to her life, and they played together every night.

We are delighted to present the inaugural Frontiers in Aging Women in Molecular Mechanisms of Aging Research series of article collections. At present less than 30% of researchers worldwide are women. Long standing biases and gender stereotypes are discouraging girls and women to enter science related fields and STEM research in particular. Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO. To change traditional mindsets gender equality must be promoted. Stereotypes defeated and girls and women should be encouraged to pursue STEM careers. Therefore Frontiers in Aging is proud to offer this platform to promote the work of women scientists who are involved in research in the field of aging and related molecular mechanisms. The work presented in this Research Topic highlights the diversity of research performed and presents advances in theory, experiment and methodology with applications to compelling problems covering the following aspects but not limited to: Sex differences in molecular mechanisms of aging, Sex dimorphism in age related diseases, Perspectives on the future of Molecular Mechanisms of Aging Research, Molecular Mechanisms of Aging Research and its impact on older women. Articles spotlighting excellent female led contributions to the field of Aging, Perspectives on a specific field of Molecular Mechanisms of Aging Research inspired, started or sparked by a woman.
