Confessions of a Cereal/Serial Dater Sharon Scholfield,2011-10 Yes there is life and love after internet dating I know there are a few of you out there that actually met and married a great person you found online And even more of you that meet a person that you enjoyed on some level for some period of time But then there is the rest of us that failed miserably on all levels and need some HELP Well here is a funny little guide to helping you along the way or just add a few laughs to your day because you are not alone Hello My name is Sharon Blount Marra Scholfield I have gone back to my maiden name and I have decided that I will stay with my original name if you will Sharon Ann Scholfield I have roots in a very traditional Methodist family that no way helped me to deal with the real world But I had a lovely if not boring childhood I was a tomboy did not like to play with dolls unless we were hiding them for some sort of game When I turned 30 I decided it was more fun to be a girl and my life made a pivotal change mentally Divorced at 42 and then things really ramped up a notch More to follow I have a son Andy who is in his residency in Michigan I hope to be a grandmother some day I just hope it happens while I can still hear are you the mom or the grandma Seriously like most of you I want a traditional relationship in this ever changing world in which we live in I wish you all great adventures with someone you think is cute SAS

Power BI DAX Simplified Reza Rad,2021-07-18 DAX is the language of data analysis in Microsoft Power BI Azure Analysis Services and Excel Power Pivot DAX is a powerful language that can quickly empower you to analyze year over year or rolling 12 months calculations It is rare to find an analytics solution using Microsoft technologies especially Power BI that doesn t require some calculations to be written by DAX As a Power BI or Microsoft BI developer it is essential to learn this language and master it Learning a language is not just learning the structure and functions It is learning how where and when to use it so that you can solve real world problems with it In my training and consulting experience on Power BI I realized that DAX is the weak point for many Power BI users DAX itself is not a complex language It is merely a language of expression The complexity of learning DAX is not the formula or the functions It is how to use it in real world scenarios and how it performs on a dataset or visual I have been writing many blogs about DAX for many years My blog articles are all coming from my experience working with Power BI I found it helpful to compile them all in a book Because my blog articles practically explain things I thought it better to title it as a practical way of learning DAX by examples Indeed there are books articles and Microsoft documentation on how each function works where and how However learning these

through an example would bring a new way of understanding it A good analytics solution is a combined outcome of a good data model good data preparation and good analytics and calculations I have written another book about the Basics of modeling in Power BI This book is covering the calculation and DAX aspects of it This book is for you if you are building a Power BI solution Even if you are just visualizing the data calculations are an essential part of analytics You do need to have the calculation ready before visualizing it This is not a book to explain every single function in DAX The approach in this book is to have practical examples Every chapter is based on real world examples of using a combination of functions to solve a challenge You can start from any chapter and finish at any chapter The order of chapters suggested in this book is just a guideline to help you have a smooth flow of topics Each chapter can be read without needing other chapters Examples of this book are designed in a way that you can use the learning straight away in your Power BI file

Whistler, 1915 *Anglo-Saxon Prognostics, 900-1100* Sándor Chardonnens, 2007-06-30 Recent scholarship on the Anglo Saxon prognostics has tried to place these texts within the realm of folklore and medicine inspired largely by studies and editions from the nineteenth and early twentieth centuries By analysing prognostic material in its manuscript context this book offers a novel approach to the status and purpose of prognostic texts in the early Middle Ages with particular attention to the Anglo Saxon tradition From this perspective it emerges that prognostication in Anglo Saxon England was not folkloric but a scholarly pursuit by monks not primarily interested in the medical aspects of prognostication In addition this book offers for the first time a comprehensive edition of prognostics in Old English and Latin from Anglo Saxon and early post Conquest manuscripts Brill's Texts and Sources in Intellectual History vol 3
