Method Timothy Kinsella, 2004 **ASNT Level II Study Guide** ASNT Staff, William Spaulding, 1998-10 **Materials Evaluation**, 2006 **Ceramic Matrix Composites** Composite Materials Handbook - 17 (CMH-17), 2017-06-29 The fifth volume of this six volume compendium publishes technical guidance and properties on ceramic matrix composite material systems. The selected guidance on technical topics related to this class of composites includes material selection, processing, characterization, testing, data reduction, design analysis, quality control, application, case histories, and lessons learned of typical ceramic matrix composite materials. Volume 5, which covers ceramic matrix composites, supersedes MIL HDBK 17-5 of June 17, 2002. The Composite Materials Handbook referred to by industry groups as CMH 17 is an engineering reference tool that contains over 1,000 records of the latest test data for polymer matrix, metal matrix, ceramic matrix, and structural sandwich composites. CMH 17 provides information and guidance necessary to design and fabricate end items from composite materials. It includes properties of composite materials that meet specific data requirements as well as guidelines for design analysis, material selection, manufacturing, quality control, and repair. The primary purpose of the handbook is to standardize engineering methodologies related to testing, data reduction, and reporting of property data for current and emerging composite materials. It is used by engineers worldwide in designing and fabricating products made from composite materials
