

# Performance Task Sample

## **Title: Types of Electric Circuit - Open and Closed Circuits**

**Objective:** The objective of this performance task is to assess students' understanding of open and closed circuits through a hands-on project. Students will design and construct circuits that demonstrate their knowledge of the characteristics and differences between the two circuit types.

### **Instructions:**

**Research:** Students are required to conduct thorough research on open and closed circuits. They should understand the concepts, components, and how each type functions.

**Design:** Based on their research, students will design circuit diagrams for both open and closed circuits. They need to plan the layout and connections of components. The students should also include a list of a step-by-step plan for the circuit construction.

**Construction:** Using the provided materials (wires, batteries, bulbs, switches, etc.), students will construct their electric circuits according to their experimental design. They should follow their proposed circuit design and ensure that the circuit is properly connected and that the components are functioning correctly.

**Presentation:** Students will design and construct circuits that demonstrate their knowledge of the characteristics, including the flow of electric current, behavior of circuit and differences between open and closed circuits.

### **Assessment Criteria:**

**Accuracy:** The students should be able to identify and classify open and closed circuits. Precise arrangement of components, explanation of behavior and characteristics of each circuit. Including the correct demonstration of the flow of electric current in the circuits.

**Creativity:** Innovative and creative design in circuit construction which features the modifications that enhance the functionality and visual appeal of the circuit model.

**Clarity of Presentation:** The student should be able to explain, in their own words, the difference between open and closed circuits and their impact on the circuit's function.

**Research and Understanding:** To demonstrate their knowledge and understanding of electric circuit concepts, students should present their research and understanding. This includes showcasing their comprehension of open and closed circuits, electrical conductivity, and the role of different components. Their findings should reflect a deep understanding of these concepts and how they can be applied in real-life situations.
