

CAMBRIDGE INTERNATIONAL EXAMINATIONS
GCE Ordinary Level

MARK SCHEME for the May/June 2013 series

4024 MATHEMATICS (SYLLABUS D)

4024/21

Paper 2, maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Special chapters cover health, the manufacturing sector and economic participation of women. Open Economy Macroeconomics Martín Uribe, Stephanie Schmitt-Grohé, 2017-04-04 A cutting edge graduate level textbook on the macroeconomics of international trade. Combining theoretical models and data in ways unimaginable just a few years ago, open economy macroeconomics has experienced enormous growth over the past several decades. This rigorous and self-contained textbook brings graduate students, scholars and policymakers to the research frontier and provides the tools and context necessary for new research and policy proposals. Martín Uribe and Stephanie Schmitt-Grohé factor in the discipline's latest developments, including major theoretical advances in incorporating financial and nominal frictions into microfounded dynamic models of the open economy, the availability of macro and microdata for emerging and developed countries, and a revolution in the tools available to simulate and estimate dynamic stochastic models. The authors begin with a canonical general equilibrium model of an open economy and then build levels of complexity through the coverage of important topics such as international business cycle analysis, financial frictions as drivers and transmitters of business cycles and global crises, sovereign default, pecuniary externalities, involuntary unemployment, optimal macroprudential policy, and the role of nominal rigidities in shaping optimal exchange rate policy. Based on courses taught at several universities, *Open Economy Macroeconomics* is an essential resource for students, researchers and practitioners. Detailed exploration of international business cycle analysis. Coverage of financial frictions as drivers and transmitters of business cycles and global crises. Extensive investigation of nominal rigidities and their role in shaping optimal exchange rate policy. Other topics include fixed exchange rate regimes, involuntary unemployment, optimal macroprudential policy, and sovereign default and debt sustainability. Chapters include exercises and replication codes. *Expression of emotion in music and vocal communication* Anjali Bhatara, Petri Laukka, Daniel J. Levitin, 2014-08-18 Two of the most important social skills in humans are the ability to determine the moods of those around us and to use this to guide our behavior. To accomplish this we make use of numerous cues. Among the most important are vocal cues from both speech and non-speech sounds. Music is also a reliable method for communicating emotion. It is often present in social situations and can serve to unify a group's mood for ceremonial purposes.

funerals weddings or general social interactions Scientists and philosophers have speculated on the origins of music and language and the possible common bases of emotional expression through music speech and other vocalizations They have found increasing evidence of commonalities among them However the domains in which researchers investigate these topics do not always overlap or share a common language so communication between disciplines has been limited The aim of this Research Topic is to bring together research across multiple disciplines related to the production and perception of emotional cues in music speech and non verbal vocalizations This includes natural sounds produced by human and non human primates as well as synthesized sounds Research methodology includes survey behavioral and neuroimaging techniques investigating adults as well as developmental populations including those with atypical development Studies using laboratory tasks as well as studies in more naturalistic settings are included

The Economic and Financial Crisis and Collective Labour Law in Europe Niklas Bruun,Klaus Lörcher,Isabelle Schömann,2014-09-18 The current economic and financial crisis erupted several years ago Its effects impacted deeply upon society in which legal rules and social patterns have developed to enable the establishment of civilisation justice and peace Over time it has become more and more obvious that policy financial and economic actors have adopted austerity measures as a main tool to solve the ensuing problems and that these measures have hit social policy standards sometimes dramatically Recent analyses have dealt with several aspects of this issue This book focuses on one important element the impact on collective labour law It seeks to add to the debate by presenting mainly legal arguments derived from different sources and backgrounds examining the EU and Troika measures the economic and political background and the sometimes dramatic consequences of austerity measures on democracy collective bargaining and the right to strike Against the framework of EU law the relevant ILO Conventions Revised European Social Charter and European Convention on Human Rights provisions the non compliance of these measures is analysed and demonstrated The book is also dedicated to procedural questions and in particular how legal approaches may be used to challenge austerity measures
