**Life Writing and Schizophrenia** Mary Elene Wood, 2013-09-05 How do you write your life story when readers expect you not to make sense How do you write a case history that makes sense when face to face with schizophrenia your ability to tell a diagnostic story begins to fall apart This book examines work in several genres of life writing autobiography memoir case history autobiographical fiction focused either on what it means to live with schizophrenia or what it means to understand and treat people who have received that diagnosis Challenging the romanticized connection between literature and madness Life Writing and Schizophrenia explores how writers who hear voices and experience delusions write their identities into narrative despite popular and medical representations of schizophrenia as chaos violence and incoherence The study juxtaposes these narratives to case histories by clinicians writing their encounters with those diagnosed with schizophrenia encounters that call their own narrative authority and coherence into question Mary Wood is

**Review of Existential Psychology and Psychiatry** ,1997 *Rethinking Madness* Paris Williams,2014-06-19 As the research continues to accumulate we find that the mainstream understanding of schizophrenia and the other related psychotic disorders has lost virtually all credibility We ve learned that full recovery is not only possible but may actually be the most common outcome given the right conditions Furthermore Dr Paris Williams own groundbreaking research as mentioned in the New York Times has shown that recovery often entails a profound positive transformation In Rethinking Madness Dr Williams takes the reader step by step on a highly engaging journey of discovery exploring how the mainstream understanding of schizophrenia has become so profoundly misguided while crafting a much more accurate and hopeful vision As this vision unfolds we discover a deeper sense of appreciation for the profound wisdom and resilience that lies within all of our beings even those we may think of as being deeply disturbed while also coming to the unsettling realization of just how thin the boundary is between so called madness and so called sanity
