**The Dangers of Automation in Airliners** Jack J. Hersch, 2020-11-24 The award winning journalist delves into the confluence of modern airplane technology and pilot behavior to probe how and why flight disasters happen BookTrib Aviation automation has been pushed to its limits with pilots increasingly relying on it Autopilot autothrottle autoland flight management systems air data systems inertial guidance systems All these systems are only as good as their inputs which incredibly can go rogue Even the automation itself is subject to unpredictable failure And what of the pilots They began flight training with their hands on the throttle and yoke and feet on the rudder pedals Then they reached the pinnacle of their careers airline pilot and suddenly they were going hours without touching the controls other than for a few minutes on takeoff and landing Are their skills eroding Is their training sufficient to meet the demands of today's planes The Dangers of Automation in Airliners delves deeply into these questions You'll be in the cockpits of the two doomed Boeing 737 MAXs the Airbus A330 lost over the South Atlantic and the Bombardier Q400 that stalled over Buffalo You'll discover exactly why a Boeing 777 smashed into a seawall missing the runway on a beautiful summer morning And you'll watch pilots battling sometimes winning and sometimes not against automation run amok This book also investigates the human factors at work You'll learn why pilots might overlook warnings or ignore cockpit alarms You'll observe automation failing to alert aircrews of what they crucially need to know while fighting to save their planes and their passengers The future of safe air travel depends on automation This book tells its story

**Air Navigation** Octavian Thor Pleter, 2024-04-22 This book takes a new approach to air navigation extending the classic scope of positioning and guidance to efficient and safe 4D flight trajectory management Modern air navigation aims at flight trajectories optimisation There is an infinite number of

solutions to the classic navigation problem of flying from one airport to another but most of them are wasteful of resources and even risky Minimising all costs and risks incurred by the 4D flight trajectory makes air navigation both efficient and safe which are key factors in air navigation services Beyond minimising fuel burn and CO2 efficiency addresses non CO2 emissions and noise This is a visually intensive book using examples and case studies to illustrate the concepts the physics of navigation and the mathematical models involved Numerical examples reflect its problem solving nature It is useful to aerospace students engineers pilots air traffic controllers technicians and scientists curious about aviation Aviation and Human Factors Jose Sanchez-Alarcos,2019-06-19 Air safety is right now at a point where the chances of being killed in an aviation accident are far lower than the chances to winning a jackpot in any of the major lotteries However keeping or improving that performance level requires a critical analysis of some events that despite scarce point to structural failures in the learning process The effect of these failures could increase soon if there is not a clear and right development path This book tries to identify what is wrong why there are things to fix and some human factors principles to keep in aircraft design and operations Features Shows through different events how the system learns through technology practices and regulations and the pitfalls of that learning process Discusses the use of information technology in safety critical environments and why procedural knowledge is not enough Presents air safety management as a successful process but at the same time failures coming from technological and organizational features are shown Offers ways to improve from the human factors side by getting the right lessons from recent events **Cockpit** Society of Experimental Test Pilots,1994 One no of each vol includes the Society s symposium proceedings *Aviation Week & Space Technology* , **Aim/far 2005** Charles F.
