24 Multiplication Table To 100

Jöran Friberg, Farouk N.H. Al-Rawi

24 Multiplication Table To 100:

New Mathematical Cuneiform Texts Jöran Friberg, Farouk N.H. Al-Rawi, 2017-02-13 This monograph presents in great detail a large number of both unpublished and previously published Babylonian mathematical texts in the cuneiform script. It is a continuation of the work *A Remarkable Collection of Babylonian Mathematical Texts* Springer 2007 written by Jöran Friberg, the leading expert on Babylonian mathematics. Focussing on the big picture, Friberg explores in this book several Late Babylonian arithmetical and metro-mathematical table texts from the sites of Babylon, Uruk and Sippar, collections of mathematical exercises from four Old Babylonian sites as well as a new text from Early Dynastic Early Sargonic Umma, which is the oldest known collection of mathematical exercises. A table of reciprocals from the end of the third millennium BC, differing radically from well-documented but younger tables of reciprocals from the Neo-Sumerian and Old Babylonian periods as well as a fragment of a Neo-Sumerian clay tablet showing a new type of a labyrinth are also discussed. The material is presented in the form of photos, hand copies, transliterations and translations accompanied by exhaustive explanations. The previously unpublished mathematical cuneiform texts presented in this book were discovered by Farouk Al-Rawi, who also made numerous beautiful hand copies of most of the clay tablets. Historians of mathematics and the Mesopotamian civilization, linguists and those interested in ancient labyrinths will find *New Mathematical Cuneiform Texts* particularly valuable. The book contains many texts of previously unknown types and material that is not available elsewhere.

Basic Concept of Abacus: Part -1 Amar Bara Khatua, 2020-06-05 I am happy to present this book to the students who wish to learn abacus and wish to appear in the objective type competitive examination. In such examinations, the students are required to solve the problems in limited time. The conventional method of solving the mathematical problems is not only time-consuming but also prone to mistakes because of lengthy methods involved. This book explains the short-cut method through abacus and integrating approach of Vedic mathematics method and abacus method of solving the problems in a faster way. For the convenience of students and easy understanding, the basic approach of abacus is divided into various chapters of learning, and each chapter is again divided into various steps. This book covers basic terminology of abacus formulae, in abacus and their applications in performing the basic operations of mathematics including additions, subtractions, multiplications and division. Each chapter contains rules, formulae, examples of solution with step-by-step approach and exercises for practice.
