

Chapter 24 Study Guide

Professional Ethics

1. Define "professional ethics".

Internal control of a profession based on human values or moral principles

2. Define "caring".

Care for, an emotional commitment to and a willingness to act on behalf of a person with whom a caring relationship exists

3. When faced with an ethical problem or dilemma, what do *most* professionals end up doing?

They simply obey the rules of their institution, follow the policies of their supervisor, or choose the least objectionable course of action among a bewildering array of choices, each of which may have profound consequences for patient care

4. Define "ethics".

Systematic study of rightness and wrongness of human conduct and character as known by natural reason

5. Define "laws".

Regulations established by government and applicable to people within a certain political sub-division

6. Define "morals".

Generally accepted customs, principles or habits of right living and conduct in a society and the individual practice in relation to these

7. Compare "ethics", "laws", and "morals" by completing the chart below.

System:	Ethics	Laws	Morals
Application:	Specific group	Political subdivision	Individuals

24 Study Guide Answers Chapter 24:

Pediatric Critical Care Study Guide Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10
This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner. **Critical Care Study Guide** Gerard J. Criner, Gilbert E. D'Alonzo, 2013-03-09
Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states requiring extensive knowledge and clinical acumen are commonly found. Caring for critically ill patients requires an extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and therapeutic interventions. Because this knowledge base crosses many different disciplines, introduction to caring for the intensive care patient while exciting may also be intimidating. This textbook is designed toward making the dynamic environment of the critical care unit understandable and the approach to the patient both logical and successful. The book contains three components: 1. description of the procedural tasks commonly performed for the critically ill patient; 2. explanation of the most common pathophysiologic states encountered; and 3. description of specific disease entities with details of their differential diagnosis, diagnostic strategy, and therapeutic plan. This book also uses several educational approaches that we have found useful in our own teaching sessions and prior textbooks. Clinical cases introduce chapters and highlight chapter segments to emphasize clinical relevancy. As an additional study aid, margin notes highlight important teaching points and facilitate easy review of chapter content. To consolidate the principles outlined in each chapter, review questions with full text explanations are provided at the end of each chapter. All these elements help reinforce the most important messages for the reader.
