Singh, Priyanie Amerasinghe, 2014-06-13 The population of cities around the world is growing at an alarming rate and as a result the landscapes of most cities are going through enormous changes In particular fertile agricultural lands at the periphery of cities are being developed without consideration of holistic planning As such peri urban areas zones of transition from rural to urban land uses located between the outer limits of the urban and the rural environment are experiencing significant losses of agricultural land increased runoff and water quality degradation Concurrently the demands for water food and energy are increasing within cities and unless a balance is struck the liveability of these cities will soon be compromised The current water and land use changes have serious consequences on lifestyle environment health and overall well being of urban communities This book therefore helps readers to understand the current issues and challenges and examines suitable strategies and practices to cope with current and future pressures of urbanisation and peri urban land use changes The book examines a number of critical aspects in relation to the future of cities and peri urban regions including

the suitability of policies and institutions to sustain cities into the future impact of current trends in land use change population increase and water demand long term planning needs and approaches to ensure the secured future for generations ahead and strategies to adapt the cities and land uses so that they remain viable and liveable The readership of the book will include policy makers urban planners researchers post graduate students in urban planning and environmental and water resources management and managers in municipal councils **Peri-urban futures: Scenarios and models for land use change in Europe** Kjell Nilsson, Stephan Pauleit, Simon Bell, Carmen Aalbers, Thomas A. Sick Nielsen, 2013-02-05 Presently peri urbanisation is one of the most pervasive processes of land use change in Europe with strong impacts on both the environment and quality of life It is a matter of great urgency to determine strategies and tools in support of sustainable development The book synthesizes the results of PLUREL a large European Commission funded research project 2007 2010 Tools and strategies of PLUREL address main challenges of managing land use in peri urban areas These results are presented and illustrated by means of 7 case studies which are at the core of the book This volume presents a novel future oriented approach to the planning and management of peri urban areas with a main focus on scenarios and sustainability impact analysis The research is unique in that it focuses on the future by linking quantitative scenario modeling and sustainability impact analysis with qualitative and in depth analysis of regional strategies as well as including a study at European level with case study work also involving a Chinese case study **Land Use in an Urban Environment: a General View of Town and Country Planning** Paul Brenikov, 1961
