 high emitter of carbon but it is nevertheless one of the countries most critically affected There is a significant risk of damage  
 to lives and livelihoods due to climate change in the form of cyclones flooding and storm surges and slow onset impacts such  
 as droughts sea level rises and river basin erosion Moreover Bangladeshis are especially vulnerable as a high proportion of  
 people live in extreme poverty This book assesses the impact of climate change in Bangladesh and presents the findings of a  
 three year in depth study undertaken at village level in different districts of the country It examines national policies  
 contrasting them with what is actually happening at village level It outlines the impact of climate change on livelihood  
 strategies and health and focuses particularly on the impact on gender relations showing that although women have a  
 significant role to play in helping communities cope with the effects of climate change cultural customs and practices often  
 work against this The book argues for and puts forward policy proposals for recognising women's active contribution and  
 supporting gender equality as a critical strategy in global adaptation to climate challenges      **Laws of the State of Illinois
