Kesavan, 2016-07 **Routledge Handbook of Food as a Commons** Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights

and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings   **English Mechanic and Mirror of Science and Art** ,1886   **The American** ,1882   Cumulated Index to the Books ,1943   **New Breeder's Gazette**
