**Terraced Landscapes** Drago Kladnik, 2017-09-01 Terraced landscapes with agricultural terraces are cultural landscapes with a special value. They provide food and also have priceless scientific, cultural, historical, ecological, aesthetic and even psychological, philosophical and religious value. They form a unique agricultural and ecological system that can be found throughout the world. In some developed civilizations they were created in an organized manner over millennia and in others they arose completely spontaneously as people adapted to natural conditions and improved their opportunities to make a living. They therefore reflect a harmony between man and nature and in many cases also between people themselves. This volume presents them in pictures and words in all their diversity and attractiveness. After discussing the global and European dimensions of terraced landscapes and their agricultural terraces, the volume focuses on Slovenian terraced landscapes; they are discussed separately by landscape types and sample cases in the territory of selected settlements/pilot areas. The conclusion also draws attention to the exceptional value and appeal of non-agricultural terraced landscapes that have been shaped by nature and man. \_\_\_\_\_ Terasirane pokrajine sestavljene iz kmetijskih teras so kulturne pokrajine s posebno vrednostjo. Zagotavljajo hrano imajo pa tudi neprecenljivo znanstveno, kulturno, zgodovinsko, ekološko, estetsko, celopsihološko, filozofsko in religiozno vrednost. So svojstven kmetijski in ekološki sistem po celem svetu. Ponekod so v razvitih civilizacijah organizirano nastajale skozi tisočletja, drugje pa povsem spontano, ko se je lovek prilagajal naravnim razmeram in izboljševal svoje možnosti za preživetje. Zato se v njih zrcali sožitje med lovekom in naravo, marsikje pa tudi med ljudmi. Knjiga jih v sliki in besedi predstavlja v vsej njihovi pestrosti in privlačnosti. Najprej so izpostavljene svetovne in evropske razsežnosti terasiranih pokrajin in njihovih kmetijskih teras, precej prostora pa namenja tudi slovenskim terasiranim pokrajinam in sicer loeno po pokrajinskih tipih in po vzor njih primerih, ki obsegajo območja izbranih naselij. V sklepnem delu opozarja tudi na izjemnost in privlačnost nekmetijskih terasiranih pokrajin, ki sta jih oblikovala narava in lovek. **Learning from Global**

**Food and Nutrition Insecurity** Rafael Perez-Escamilla, Amos Laar, Susan Vorkoper, 2024-11-06 As access to healthy nutritious and safe food becomes increasingly unreliable, especially among low-income groups, research on food insecurity is of critical importance both domestically and abroad. Scientists around the world are leading the way in testing innovative public health and policy strategies to address the reasons behind this trend and develop policies and effective interventions and programs. Despite recognising the global impact of food and nutrition insecurity, efforts to address it are often siloed and fractured. Sharing research strategies and proven methods among researchers worldwide can help identify common ground and lessons learned for the adaptation and implementation of evidence-informed food and nutrition security interventions.
