**Normalizing an American Right to Health** Christina S. Ho, 2023 Normalizing an American Right to Health argues against the conventional wisdom that a U S right to health is out of reach It shows that the necessary change is not extraordinary but familiar and that the law has already laid considerable groundwork in ordinary statutes and case law The book moves from the descriptive task of showing where a right to health already exists in our legal corpus to the prescriptive

goal of showing how we could feasibly and meaningfully expand the right through ordinary policies that are widely used in other domains including impact assessments and state sponsored reinsurance

**Environmental Water Markets and Regulation** Katherine Owens, 2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate

*Handbook on Resilience of Socio-Technical Systems* Matthias Ruth, Stefan Goessling-Reisemann, 2019 The goal to improve the resilience of social systems communities and their economies is increasingly adopted by decision makers This unique and comprehensive Handbook focuses on the interdependencies of these social systems and the technologies that support them Special attention is given to the ways in which resilience is conceptualized by different disciplines how resilience may be assessed and how resilience strategies are implemented Case illustrations are presented throughout to aid understanding

From Empire's Servant to Global Citizen Michael Belgrave, 2016-12-01 The vision of two young scientists Massey University was established in 1928 to bring science to New Zealand s role as Britain s farm Massey has since become New Zealand s national and a global university with almost 140 000 alumni spread across 140 different nations This candid history looks at the university as it weathered war funding crises risk taking expansion and conflict with the government s plans for New Zealand s tertiary sector Written by distinguished historian Professor Michael Belgrave this is a lively look at how an agricultural college grew up to become a leading intellectual centre of excellence
